HASKELL IMPLEMENT AND SEED COMPANY

20-24 Chapel St. LEWISTON, MAINE
All prices in this catalogue, owing to uncertain market conditions, are subject to change without notice. Should there be a drop in the market on any article (listed in this catalogue) at time of purchase, we will gladly give the customer the benefit of the reduction. This policy applies to all grain, grass, vegetable and flower seeds as well as all other items quoted herein. WE DELIVER all Vegetable and Flower Seeds when bought at the packet, ounce, or $\frac{1}{4}$ pound prices, but when seeds ordered are listed in pounds, postage should be added at the rate of 8 cents per pound. Each additional pound add 1 cent. Insurance 3 cents. In all other cases goods will be SHIPPED F. O. B. LEWISTON.

No charge for packing, unless otherwise stated. Bags will be charged for as follows: 2 bushel bags, 30 cents; $\frac{1}{2}$ bushel bags, 20 cents; peck bags, 15 cents; $\frac{1}{2}$ peck bags, 10 cents.

We give no warranty expressed or implied, as to description, quality or productiveness of our seeds, and in sending them out, will in no way be responsible for crops or lack of satisfactory product from our seeds. If the purchaser does not accept the goods on these terms, we must be notified at once, when we will give full instructions for disposition of such goods. This is the invariable rule of reliable business houses.

We do, however, purchase our seeds from reputable growers and employ every means, taught us from years of successful dealing in seeds, to insure proper grading and purity. Seeds are tested by our experts before offering them for sale, so we are as reasonably sure of their germination as nature and science permits of assurance.

PARCEL POST INFORMATION ON PAGE 11

NOTE—We would deem it a great favor if our customers, or those wishing to remain on our mailing list, thereby receiving our catalogue, would inform us of change in address.

"GOOD EQUIPMENT MAKES A GOOD FARMER BETTER"

Haskell Implement & Seed Co.

20-22-24 CHAPEL STREET
LEWISTON, MAINE

New England Telephone Private Line 27
Foreword

Dealing with the farm, as a problem or by privilege, becomes a task regardless of the classification. Modern methods and modern machinery are a means by which pleasure becomes a part of the reward. For some, it is a vocation, while others seek it as an avocation, but both receive the great good that comes to any man who stirs up the soil and plants the seeds of productivity. No greater respect comes to those who toil than does the farmer receive. With sincere appreciation of his object in life, this catalog comes to you each year, not only for its advertising purpose but for the information and help that it will give you.

Its purpose is to present modern merchandise, reasonably priced, illustrated and described in such a way that you will understand it. Covering as it does FLOWER and VEGETABLE SEEDS, POULTRY and DAIRY EQUIPMENT, FARM and GARDEN MACHINERY and other sundry items. Long experience and careful research are the underlying principles of the selection. This policy has been followed with few variations since the establishment of the business in 1870.

There comes to every concern, which is made up of a group of associates, whose record of service indicate a following to their liking, that there is in their daily dealings with a large number of customers, a signal of thankfulness.

There is no concern of the long standing that the HASKELL IMPLEMENT & SEED COMPANY enjoys, that does not, many more times than the patron has knowledge of, feel deep gratitude for their favors large and small.

Therefore, it is only fair to be frank in expressing that appreciation in as strong words as it is the privilege of selection.

Coupled with this spirit is the wish to be considerate, fair and honest in the dealings between customer and company.
CHOICE FLOWER SEEDS—General List

Most flowering plants will live in almost any soil, but to give them a fair chance to develop, some care should be taken to make the ground suited to their needs. The soil best adapted for flowering plants generally is a light, friable loam, containing a sufficient amount of sand to render it porous. Many flowers are better if produced on plants of vigorous growth, hence a portion of the garden should be prepared by deep digging, thorough pulverization and liberal enriching with large quantities of well-rotted manure. Since some other varieties produce the largest and finest colored flowers when grown on rather light, poor soil, a portion of the garden should not be enriched. While some seeds need special treatment, the following general rules will apply to all. Make the surface of the soil as fine, smooth and level as possible; do not plant when the ground is wet; cover each lot of seeds to a uniform depth, which should be not more than four to six times the diameter of the seed; press the soil firmly over the seed; plant in rows so that the starting plants can be seen easily; thin out the young plants to prevent crowding and keep entirely free from weeds.

POSTAGE PREPAID ON ALL FLOWER SEEDS IN PACKETS AT PRICES QUOTED SPECIAL INDUCEMENTS

When the money accompanies the order, purchasers of Seeds in packets at catalogue prices may select 25 CENTS' WORTH EXTRA PACKETS FOR EACH $1.00 SENT. Thus anyone enclosing $1.00 MAY ORDER SEEDS IN PACKETS AMOUNTING TO $1.25. Two dollars sent to us with the order will pay for seeds IN PACKETS amounting to $2.50 and so on. This offer does NOT include seeds in collections by weight or measure, bulbs, plants, or anything EXCEPTING SEEDS IN PACKETS.

Plants are generally known and described as Annuals, Biennials and Perennials. The term annual is applied to plants which flower and ripen their seeds the same season. Hardy annuals are those which may be sown in the open ground. Half hardy annuals are those which should be started in the house and transplanted to the garden. The term biennial is applied to plants which flower the second season after planting and then perish; the term perennial to plants which flower the second season after planting, and continue to flower year after year.

ADONIS. Hardy annual. Showy, popular border flowers. Pretty foliage with scarlet blossoms. Remain in bloom a long time. One foot high. Pkt., .10

AGERATUM. (Floss-Flower). Half hardy annual. Blossoms continually throughout the summer. Highly prized for bedding out, and valuable for winter blooming indoors.

Imperial dwarf. Dark blue. 9 in.; good for edging. Pkt., .10

ALYSSUM. Very hardy, free blooming dwarf plants, all varieties growing freely in common soil. The pretty, fragrant flowers are much prized for bouquets; excellent for the summer garden.

Little Gem. White. Hardy annual. They grow but three or four inches in height, very compact, or spreading growth, each plant often forming a circle a foot in diameter. Pkt., .10

Saxatile Compactum. Perennial. Grows about nine inches high, producing a mass of yellow blossoms. Pkt., .10

Tricolor. Mixed—Carmine scarlet, splendid variety. 4 to 5 feet. Pkt., .10
The Aster is of easy culture and very popular. Plants from seed grown in the open ground in May bloom finely in September and October. For July and August flowers sow in March or April in cold frame, spent hot-bed, or in pots or boxes in the house. Cover the seeds about half an inch deep with rich, light soil, and when the plants have three or four leaves transplant about 18 inches apart each way into well prepared beds. Manures too fresh or used in too large quantities sometimes induce disease in Asters. When used they should be thoroughly well decayed and mixed with the soil. Small quantities of slaked lime or fresh wood-ashes stirred into the surface of the Aster beds form good tonics for the plants and keep disease and insects from the roots.

AMERICAN BRANCHING. A free growing Aster of robust, erect habit. The blossoms are large and are borne at the end of each branch. They are almost round and are very desirable for cutting. Height, 2 to 3 feet.

Crimson .................................. Pkt., .10
Rose ...................................... Pkt., .10
White ...................................... Pkt., .10
Finest Mixed ................................ Pkt., .10

GIANT COMET. These are one of the most popular varieties. The plants are of a pyramidal form and the blossoms, whose petals are curled and twisted, are borne on long strong stems. They resemble Japanese Chrysanthemums. Height, 2 feet.

Crimson .................................. Pkt., .10
Rose Pink .................................. Pkt., .10
Dark Blue .................................. Pkt., .10
White ...................................... Pkt., .10
Finest Mixed ................................ Pkt., .10

QUEEN OF THE MARKET. An early flowering variety. Flowers are of medium size, fully double, and have long slender stems. Very fine for bedding. Height, 1½ feet.

Finest Mixed ................................ Pkt., .10

HEART OF FRANCE. The largest flowering dark red Aster grown. Opens red and deepens with age, retaining its beauty to the end. Flowers are borne on long strong stems. Height, 2 feet. Pkt., .10

ALL SortS MIXED. A mixture of all varieties and all colors. ......................... Pkt., .10

Try our Purity Lawn Seed
CALendula. Vigorous, hardy, free-flowering annuals, with large, flat, double flowers; valuable for growing in light soils, or dry situations. They are useful as cut flowers, and are frequently grown under glass during winter for cutting. 1 foot.

THE BALL. Double Bright Orange.....Pkt., .10

CALLIOPSIS. A half hardy annual of quick growth, doing well in almost any location, and blooming throughout the season. It is exceedingly showy and of easiest culture.................Pkt., .10

Dwarf Mixed .............................................Pkt., .10

CAMPANULA. Hardy perennial. These grand old flowers are of easiest culture, and one of the most attractive. Sow seed in the open the last of June or first of July, and transplant. They will bloom the following spring if protected over winter.

Medium. Old fashioned Canterbury Bell.

Mixed .......................................................Pkt., .10

CAnna. Indian Shot. Annual. The luxuriant foliage and superb flower of the Cannas, especially of the new French and Italian races, easily places them foremost among our sub-tropical plants.

Crozy's Newest Mixture.................................Pkt., .10

CANDYtuFt. Showy, hardy annuals, growing about a foot in height. Excellent for bouquets.

Carmine..................................................Pkt., .10

Empress White .............................................Pkt., .10

Mixed ......................................................Pkt., .10

CARNATIONS—Marguerite—The earliest of all Carnations, blooming in July or August if sown in spring and continuing till frost. Being half-hardy perennials, a slight protection of coarse straw or pine boughs will preserve them during winter and they will flower profusely the next summer, or they may be potted to bloom during the winter in the house. The flowers are large, about eighty per cent. usually coming double; beautifully fringed and clove-scented.

Giant White..............................................Pkt., .10

Giant Rose................................................Pkt., .10

Giant Red................................................Pkt., .10

Giant Mixed..............................................Pkt., .10

Centaurea Cyanus

CENTAUREA. Flowering Annuals. Giant Corn Flower. The flowers are of enormous size; and of the most charming colors, including white, pink, lilac, rose and purple. They are among our best summer flowers for cutting.

Dark Blue...............................................Pkt., .10

Cyanus—Bachelor's Buttons, mixed....................Pkt., .10

CELOSIA, or Coxcomb. Showy annuals of easy cultivation; producing large, brilliant, comb-like flower heads. They prefer a light soil, and should not be allowed to become crowded if a dwarf habit is desired.

Tall Mixed..............................................Pkt., .10

Try Our Purity Lawn Seed
CHRYSANThEUM (Annual Varieties)
Showy, hardy annuals of easiest cultivation and blooming early in summer. They are most desirable for sea-shore and mountain garden. Height, 2 feet.
Double Mixed ........................................................................... Pkt., .10

COROEA SCANDENS. Tender Annual. A fine rapid growing climber with handsome foliage and large, bell-shaped flowers, green at first but rapidly changing to a beautiful, deep violet-blue. Seed should be planted on edge in hot bed or rather dry soil and barely covered. ......................................................... Pkt., .10

CONVOLVULUS MAJOR—Tall Morning Glory. Hardy annual. The most popular and widely grown climber for covering verandas, trellises, etc.
Finest Mixed .................................................................. Pkt., .10
Japanese Morning Glory .......................................................... Pkt., .10

CYPRUS VINE. Ipomoea Quamoclit. Very graceful twining annuals with feathery dark green foliage and star-like flowers. Twenty feet.
Scarlet............................................................................. Pkt., .10

COSMOS. Annual. This is one of our most useful and beautiful autumn flowers. To get it in bloom early, the seed should be sown in May in the open ground where the plants are desired to bloom, and the seedlings allowed to grow and flower without being transplanted.
Finest Mixed .................................................................. Pkt., .10

DAHLIA. This popular flower can be easily raised from seed and flowered the same season. The roots should be placed in dry sand and kept in a cellar where there is no frost during the winter.
Finest Mixed .................................................................. Pkt., .10

DELPHINIUM—Perennial Larkspur. One of the most beautiful of the perennials. They are of easy culture and of vigorous growth.
The New Hollyhock Strain. Height, 3 to 4 feet. ............. Pkt., .10

Gloxinae flowered. Mixed ................................................. Pkt., .10

DOLICHOS LABLAB. (Hyacinth Bean.) Annual. Purple. 10 feet. .............................................................. Pkt., .10

GAILLARDIA. Blanket Flower Biennial. Daisylike flowers in various shades of yellow with dark brown centers. Blooms the entire season.
Finest Mixed .................................................................. Pkt., .10

ESCHSCHOLTZIA. California Poppy. The bright colors, long duration and dwarf habit of these free-blooming, hardy annuals, admirably adapt them for massing and border planting. Height, 1 foot.
California Alba—White ....................................................... Pkt., .10
Yellow ............................................................................ Pkt., .10
Mixed ............................................................................ Pkt., .10

GOURDS. Luxuriant, climbing annuals, useful in covering arbors, fences or slopes, and bearing gourds which are of interesting forms and colors. 10 to 15 feet.
Mixed ............................................................................ Pkt., .05

GYPSOPHILA. Infant's Breath. Annual. Free flowering, hardy plants, extremely light and graceful, easy of cultivation, and most useful for bouquet and cut-flower work. Height, 18 inches.
Mixed ............................................................................ Pkt., .10
HELICHRYSUM. Everlasting Flower. Showy annuals for beds or borders; useful as dried flowers for winter bouquets, for which use the blooms should be cut before they are fully open, and hung up to dry with the flowers downward if stiff stems are desired. Height, 2 feet.

Double Mixed ........................................... Pkt., .10

HELIANTHUS. Sunflower. Hardy annual. The large varieties are useful in forming backgrounds of large beds or borders and for distant effects, while the smaller sorts may be planted with scarlet Salvia, Cannas and other tall bedding plants, besides being excellent for cutting.

Double Mixed ........................................... Pkt., .10

HOLLYHOCK. Hardy Biennial. This ever popular hardy favorite of our gardens has very few rivals in majestic grandeur. Hollyhocks succeed best in rich, well-drained soil. They should be lightly protected during winter with pine boughs, coarse straw, or other mulch not liable to rot. Seeds sown in July produce fine plants for blooming the following summer. 6 to 8 ft.

Chaters Strain. Double finest mixed....... Pkt., .10

HUMULUS JAPONICA. Japanese Hop. Splendid annual climber of fast growth and very ornamental. 12 ft.................................................. Pkt., .10

KOCHIA TRICHOPLIA. (Standing or summer Cypress.) Splendid ornamental annual of unusually quick growth, forming regular pyramids of about 3 ft. in height. The slender-leaved plants are of a cypress-like appearance during the summer, changing their light-green foliage to carmine and blood-red colorings. The plant, also called “Burning Bush,” is of great value when planted singly or in groups, as well as for pot culture. 3 ft.................................................. Pkt., .10

Larkspur. Splendid hardy annuals with showy flowers borne on long spikes; white, lilac, and all shades of blue; excellent for cutting. Height, 18 inches.

Double Tall. Branching or stock flower mixed.

Pkt., .10

LOBELIA. Annual. The Erinus varieties are most valuable for edgings, hanging baskets and vases, blooming profusely from June till frost.

Crystal Palace Compacta. The darkest blue. Pkt., .10

MARIGOLD. Tagetes. These handsome half-hardy annuals when well grown cannot be surpassed either in mixed borders or when grouped together. They succeed best in moderately rich soil and in open situations, and are strongly recommended where a gorgeous display in the autumn is an essential feature.

African—Double tall yellow.......................... Pkt., .10

African—Double tall mixed............................ Pkt., .10

French—Double tall mixed............................. Pkt., .10

MYOSOTIS—Forget-Me-Not. Dwarf, half-hardy perennials, bearing a profusion of little, star-shaped flowers. They thrive best in rather moist, shady situations. Most of them will bloom the first year from seed if sown early. If sown in July or August in shaded frame, fine plants will be obtained for spring blooming. They are very beautiful when planted in combination with late spring bulbs, Daisies, Arabis or Golden Alyssum.

Palustris—True Forget-Me-Not. Dark blue, very beautiful; profuse flowering. Pkt., .10
Marvel of Peru—Four O’clock. An old-fashioned, sweet-scented annual of various colors. Useful for beds or borders. Height, 2 ft.

Mignonette—Reseda Odorata. The most fragrant annual, prized as much for forcing in winter as for the summer garden. The seed should be sown early and the plants as they grow, thinned sufficiently to allow them to branch. The beds should be liberally watered during dry weather.

Nasturtiums—Dwarf varieties mixed.

Tom Thumb, or Dwarf. These hardy annuals are of easiest cultivation; succeeding best in rather light soil, withstanding heat and drought and flowering profusely from June or July until cut down by severe frost, usually well into November. The dark-leaved varieties are particularly adapted for ribbon beds and borders, the brilliant flowers contrasting admirably with the bronzy foliage. Height, 1 foot.

Nasturtiums—Tall or Climbing.

Besides their ordinary garden use for trailing over fences, trellises, stone walls, etc., these can also be grown as pot plants for winter flowering, as screens or as trailers for hanging baskets and vases; 8 to 12 feet.

Nicotiana Affinis—Annuals.

Sylvestris. A splendid new variety with glaucous leaves and large pendants, pure white, tube-shaped flowers; a very stately plant.

Papaver or Poppy. Annual varieties, showy, hardy annual of the easiest cultivation and embracing many rich and beautiful colors. The seed should be sown early in spring where intended to bloom.

Phlox Drummondi. This is one of the finest annuals, being hardy, easy of cultivation and making as a summer bedding plant an effective and brilliant display. The flowers are of large size, finely-rounded form, and with well-defined eyes. The colors are superb.

Grandiflora Finest Mixed .......................... Pkt., 10
PHLOX. Perennial. Another of the old-fashioned flowers. Grows from 2 to 3 feet high, with large heads of fragrant blossoms.
Mixed ........................................... Pkt., .10

PORTULACA. Charming dwarf annuals for sunny situations or light soils, producing flowers of most brilliant colors in great profusion. Height, 6 inches.
Grandiflora Plenissima—Double Mixed...........Pkt., .10
Grandiflora—Fine Single Mixed..................Pkt., .10

PHYSALIS. Chinese Lantern. A hardy perennial grown for its scarlet seed pods, which are easily dried for winter bouquets. Easily grown. ...............Pkt., .10

RICINUS. Castor Oil Plant. Tender annuals of rapid and gigantic growth, producing enormous dark green or bronze-colored palmate leaves; excellent for sub-tropical beds, or for massive foliage effects on lawns or backgrounds.
Pkt., .10

SALPIGLOSSIS. Half-hardy annuals; elegant late summer flowering plants of great diversity in color; beautifully penciled in rich tints of yellow, purple and brownish red. Of easy culture.
Grandiflora—Finest Mixed........................Pkt., .10

SALVIA. Flowering Sage. Very ornamental; flowers borne in spikes of fiery red, crimson or blue, and continue in bloom in open ground until after severe frosts. Start in heat and transplant into light soil one or two feet apart. Tender perennials, but bloom the first season. Height, 2 ft. to 3 ft.
Splendens—Scarlet ...............................Pkt., .10

SWEET WILLIAM. Dianthus Barbatus. Showy, hardy biennials of easiest culture; admirable for clumps among shrubs or borders. Height, 18 inches.
Hunt's Perfection Mixed.........................Pkt., .10

PHLOX. Perennial. Another of the old-fashioned flowers. Grows from 2 to 3 feet high, with large heads of fragrant blossoms.

PANSIES

Pansy, or Heartsease. Too much importance cannot be attached to the culture of these beautiful plants, flowering as they do in great abundance for several months. When sown in the early spring a good display in most cases can be had in the following fall, but the best results are not obtained by so doing. To obtain fine blooms it is better to sow during summer and transplant the seedlings in cold frames in September, protecting during the winter with mats or shutters. Pansies delight in a cool, moist, well drained soil, enriched with decomposed barn-yard manure. They should never be allowed to suffer for want of water.

SWEET PEAS

Sweet Peas well deserve the place they have earned in the hearts of all lovers of flowers. Their beauty and fragrance, together with their vigorous growth and the ease with which they are grown, make them one of the most popular of garden annuals. They will thrive in any garden and bear all summer an abundance of beautiful fragrant flowers of many wonderful shades and tints. Our Sweet Peas are unsurpassed in selection, purity and vitality.

CULTURE

Early in spring make a trench three to four inches deep in rich, mellow soil, so arranged that no water can stand in it, and plant the seed in the bottom, covering at first only one inch deep. In soils at all heavy, or composed largely of clay, put about one inch of sand in the bottom of the trench and sow the seed on this, covering with more sand. Cover the row with a board to shed the rain and protect the soil from the hot sun, but remove this as soon as the young plants appear.

When the plants are two inches high, cultivate, and as they grow, gradually fill up the trench. When the plants are about five inches high it is desirable to furnish some support for the vines to run upon, preferably a wire netting firmly supported by stakes to prevent sagging, but strings or brush are often used with satisfactory results.

The roots should not be allowed to become too dry. Water applied thoroughly once or twice a week, preferably early in the morning or in the evening, is usually better than light sprinkling more frequently.

The blooms should be picked before they form pods, or the plants will soon stop flowering.

Haskell's Peerless Mixture. We invite comparison of our mixture with any and all others, no matter under what name or at how high a price offered, and are certain a trial will demonstrate the superiority of our Peerless Mixture.

Owing to the fact that there are so many different named varieties and many of these are really one and the same, we have discontinued cataloguing them, selecting only the following which we consider the best:

Dorothy Eckford. Pure White.
Blanche Perry. Pink and White.
Prima Donna. Pure Pink.
Lady Grisel Hamilton. Lavender.
King Edward VII. Scarlet.

Prices on any of the above:
Pkt., .10; Oz., .15; ¼ Lb., .35; ½ Lb., .65; Lb., $1.25

Prices on Haskell's Peerless Mixture:
Pkt., .10; Oz., .15; ¼ Lb., .35; ½ Lb., .60; Lb., $1.00

Any of the above ten-cent packages, 6 Pkts. for .50; 12 Pkts., .75.

For larger, better and more Sweet Pea Blossoms, inoculate the seed with Farmogerm
Sweet Peas (Continued)

SPENCER VARIETIES

The Spencers are of exceptionally large size, the standard and wings waved or frilled and the general effect remarkably graceful and attractive. The plants are of vigorous growth and remain in bloom for a longer period than the ordinary sorts. They are produced abundantly on long stems, making them most desirable for cutting.

Astra Ohn. Suffused lavender, sometimes with pinkish tinge.

Countess. Bright, clear pink, sometimes darker toward the edges; very large with long stems. One of the very best.

Florence Morse. White with pink edge.

Helen Lewis. Rich orange.

King Edward. Brilliant crimson scarlet; very large size and of open form.

Othello. Beautiful deep maroon. One of the most reliable of the maroon shades of Spencers.

Mixture. A very fine assortment of the best varieties.

Separate Colors. 10 per Pkt., .20 oz.

Mixture ......... 10c per Pkt., .20 oz., .75 1/4 lb.

STOCK—Gilliflower. Half hardy annual. The charming colors, delightful fragrance and free-blooming character of the Stocks have made them favorite plants for both summer and winter cultivation. They are very effective for beds and borders, and their handsome spikes are invaluable for bouquets and floral decorations.

Large-Flowering, Double Ten-Week Varieties. Highest grade, pot-grown seed. The best variety for early summer blooming, producing massive pyramidal flower spikes of brilliant colors and delightful fragrance. Height, 1 foot.

Pink ............................................ Pkt., .10

White ........................................... Pkt., .10

Finest Mixed .................................. Pkt., .10

VERBENA. The Verbena is one of the most decorative and easily grown bedding plants. If started in heat in March the seedlings begin to bloom in June and continue until frost. Plants raised from seeds are stronger and flower more freely than those grown from cuttings. Half-hardy perennials. Height, 1 foot.

Hybrida—Mammoth mixed..................... Pkt., .10

Hybrida—Extra selected, dark blue........... Pkt., .10

Hybrida Candissima, white.................. Pkt., .10

FINER MIXED FLOWER SEEDS FOR WILD GARDENS

</table>
SUPERIOR VEGETABLE SEEDS

ASPARAGUS

German,—Gpargel.
Spanish,—Esparragos.

A convenient bed is about six feet wide, with a path two feet wide on each side. This will require six rows one foot apart, and a bed of that width, 50 feet, will be ample for an ordinary family requiring about one pound of seed. It will require about three years from the time of sowing until the bed is in full bearing, but once established, it is good for twenty years. It should be sown in drills one foot apart, and when the plants are four or five inches high they should be thinned out so that the plants will be nine inches apart from each other in all the rows. Great care must be taken for the first year to keep down all weeds as soon as they appear, else they will choke and destroy the young seedling Asparagus. The deeper the soil and the more manure used, the greater will be the crop.

Asparagus Roots

A saving of one or two years is effected by planting roots. These offered below are strong, two-year-old roots, and the proper size for testing. These roots are not carried in stock but will be shipped direct from the growers. Prices on the following varieties will be quoted on application.

Columbia, Mammoth White, Conover's Colossal, Barr's Mammoth and Palmetto.

BEANS

Dwarf or Bush

German,—Bohnen French,—Haricot
Spanish,—Frijole nano

Two pounds to 100 feet in drills or 150 hills; two bushels to the acre in drills.

A succession of sowing can be made from the first week in May until August. Plant in drills about two inches deep, and from eighteen inches to two feet apart, according to the richness of the soil; the poorer the soil the closer they can be planted. The seeds should be dropped about two inches apart.

Add .08 per Lb.; each additional pound add .01 if to be sent by mail.
HASKELL IMPLEMENT AND SEED CO.
LEWISTON MAINE

Black German Wax. (Black Seed.) Very early; round, yellow pods; a well-known standard sort.
Pound, .35; Two Pounds, .60; Fifteen Pounds, $3.50

Curries' Rust-proof Wax. Pods long, flat and straight, very productive and rust-proof; black seed.
Pound, .35; Two Pounds, .60; Fifteen Pounds, $3.50

Improved Golden Wax. Rust-proof. An improvement on the old Golden Wax. The pod is somewhat round, meaty and entirely rust-proof.
Pound, .35; Two Pounds, .60; Fifteen Pounds, $3.50

Green Pod Varieties

Stringless Green Pod. The pods are green, not quite as round as Valentine and less curved. The pods are stringless—absolutely—this quality at once placing the variety at top of the list among table beans.
Pound, .35; Two Pounds, .60; Fifteen Pounds, $3.50

Low's Champion. Very productive, with stringless, large flat green pods. Excellent either as a string or shell bean.
Pound, .35; Two Pounds, .60; Fifteen Pounds, $3.50

Dwarf Horticultural. Pods are of medium length, slightly curved, and when nearly developed are freely splashed with bright red on the yellow skin. The green shell beans are of good size, tender, and of fine flavor.
Pound, .35; Two Pounds, .60; Fifteen Pounds, $3.50

Burpee's Bush Lima. The only Bush form of the true large Lima. Bushes grow to eighteen inches in height and always erect.
Pound, .35; Two Pounds, .65; Fifteen Pounds, $4.00

Pole or Running

German,—Stangen Bohnen
Spanish,—Judias
French,—Haricot a Rames

One Pound to 150 hills

These are more tender and require rather more care in culture than the Bush Beans, and should be sown two weeks later. They succeed best in sand loam, which should be liberally enriched with short manure in the hills, which are formed, according to the variety, from three to four feet apart. From five to six seeds are planted in each hill, about two inches deep.

Rough cedar or similar poles about seven or eight feet long should be used for these to climb on. The poles should be set in the ground at least eighteen inches, so as to prevent being blown over.

Add .08 per Lb.; each additional pound add .01 if to be sent by mail.

Kentucky Wonder Wax. Similar to the green pod Kentucky Wonder. Pods 8 to 9 inches long. Very early.
Pkt., .20; Pound, .35; Two Pounds, .60

Lazy Wife. One of the best of the later green-podded pole beans for snaps. The pods borne in large clusters, are five to seven inches long, broad, thick, fleshy and entirely stringless. When young they have a rich, buttery flavor, which is retained until they are nearly ripe. The dry beans are excellent for winter use. Seed white.
Pound, .35; Two Pounds, .60

Kentucky Wonder

Kentucky Wonder. An excellent green podded variety; enormously productive, the long pods hanging in great clusters along the entire vine. Seed dark brown; entirely stringless.
Pkt., .20; Pound, .35; Two Pounds, .60

Lima, King of the Garden. Heavy cropper—bean and pod very large.
Pound, .40; Two Pounds, .75
BEANS (Continued)

Scarlet Runners. Usually cultivated for the beauty of its scarlet flowers. **Pkt., .15; ½ Lb., .25**

King Horticultural, or Old Fashioned Speckled Cranberry. Pods bright carmine color; both beans and pods are much larger than the common kind.

**Pkt. .20; Pound, .35; Two Pounds, .60**

Improved Yellow-eye Bean. A fine field bean and very productive.

Old-fashioned Yellow-eye Bean. An excellent field bean and much preferred to the Improved Yellow-eye as a baking bean.

Red Kidney Bean. An easily raised bean and very productive. Also greatly prized by many for baking.

Pea Beans. Native grown. Used for baking more than any other pea bean.

Sulphur Pea. Larger than the white pea bean; golden yellow color; early and of fine quality.

Soldier Bean. Similar in shape to the White Kidney but much larger, and with brown markings. Excellent cropper and free from rust.

**PRICES ON ABOVE ON APPLICATION**

**BEET**

German,—Runtel Rube  French,—Betterave  
Spanish,—Beteraga

A rather light soil, well enriched, is best suited to the cultivation of the various beets. The mangels and sugar beets in particular, require very liberal manuring. For an early crop of table beets, sow the seed as early as the ground is in condition to work; light frosts will not injure the young plants. For a main crop, sow the first of May; and for winter beets, the last of June. Sow in drills, 12 to 15 inches apart, and about one inch deep, pressing the earth firmly upon the seed,—a very important matter. Use about six pounds of seed per acre, 1 oz., 50 feet. Thin out when the plants are large enough. The varieties for table use should be left three or four inches apart.

**TABLE BEETS**

Crosby's Egyptian. This variety is as early as the original Egyptian, but by careful selection has been made thicker and of better quality.

**Pkt., .10; oz., .20; ¼ lb., .50; lb., $1.25**

Dewing's Early. Of deep red color, smooth and of fine form. One of the leading varieties, both for market and for family use.

**Pkt., .10; oz., .20; ¼ lb., .50; lb., $1.25**

Detroit Dark Red Turnip. An excellent beet for bunching for market; tops exceptionally small and upright; roots turnip shaped with small tap root. Color of skin dark blood red; flesh bright red. Quality is of the best, sweet and tender. One of the best varieties for the market gardener and the home garden.

**Pkt., .10; oz., .20; ¼ lb., .50; lb., $1.25**

Edmand’s. This variety is thoroughly fixed and uniform in type. The flesh is deep blood red in color, and exceedingly sweet and tender. It is round, smooth, of good market size, and does not grow over-large.

**Pkt., .10; oz., .20; ¼ lb., .50; lb., $1.25**

Haskell’s Special Blood Turnip. We have a very fine strain of Blood Turnip Beet, of the Edmand’s type. Very deep red fleshed so much in demand in all markets. **Pkt., .10; oz., .20; ¼ lb., .50; lb., $1.50**

Swiss Chard or Silver Sea Kale. Used as greens and the ribs of leaves cooked and served as asparagus.

**Pkt., .10; oz., .20; ¼ lb., .50; lb., $1.50**

**MANGEL-WURZEL AND SUGAR BEETS**

Sow in April or May, using eight to twelve pounds to the acre.

Price of all varieties.  **Oz., .15; ¼ lb., .30; lb., .75**
BEETS (Continued)

Improved Mammoth Long Red. An improvement on the old variety. The roots are very large, uniformly straight and well formed; proportionately thicker, and are deeper colored than the common sort, and with smaller tops.

Golden Tankard. Flesh a deep, rich yellow; very sweet and nutritious. Half long in shape. A very heavy cropper.

Norbition Giant. A mammoth, long-red variety, enormously productive, and keeps well; good for deep soils.

Lane's White Sugar. One of the best for feeding stock. Very sweet.

Mangel Danish Sludstrup. Long, reddish yellow. Grows well above the ground and easy to pull. More percentage of dry matter than in any known Mangel. Very heavy cropper.

CABBAGE

CABBAGE

German,—Kopf-Kohl  
French,—Chou Pomme

One ounce of seed produces about 3,000 plants.

Early varieties are grown from seed sown in hotbeds in February or March, only moderate bottom heat being required. Transplant into other frames ground in May, in hills the proper distance apart, using a liberal quantity of manure in the hill, besides that which is plowed in; thin out to one good plant in each hill. In the same way crops may be sown to lay in for winter use, planting seeds as late as July 1. Seeds can also be sown in shallow drills; when the plants are large enough, can be transplanted, setting the plants in rows three feet apart and two feet apart in the row. If the young plants are troubled with the cabbage fly, sprinkle them with tobacco dust, air-slaked lime, slug-shot or wood ashes, while the dew is on them.

Chinese Cabbage (Chihli). Earliest and most sure heading of the Chinese varieties. Produces long, solid white heads nearly two feet in length.

Pkt., .10; oz., .40; ½ lb., $1.50

Danish Ball Head. The wide and unfailing popularity of the Danish Ball Head cabbage is simply wonderful. It seems to adapt itself to all soils and conditions.

It is a medium to late cabbage, but is generally grown as a late crop. It is sure to head, the heads being round, hard and extremely heavy, though not
CABBAGE (Continued)

extra large. It can be grown in close quarters, on account of its compact habit.

Pkt., .10; oz., .40; ¼ lb., $1.50

All Seasons. An early Drumhead, sure heading, solid variety. Desirable for early or fall use.

Pkt., .10; oz., .40; ¼ lb., $1.25

Copenhagen Market. Extra early variety, ball shaped and evenly maturing. Best for market gardeners.

Pkt., .10; oz., .40; ¼ lb., $1.50

Charleston Wakefield. Grows to a much larger size than the Jersey Wakefield. Very productive and good shipping variety.

Pkt., .10; oz., .40; ¼ lb., $1.25

Early Jersey Wakefield. A standard early variety for home use or market.

Pkt., .10; oz., .40; ¼ lb., $1.25

Early Winningstadt. An early variety of excellent quality, not as early as the Wakefield.

Pkt., .10; oz., .40; ¼ lb., $1.25

Enkhuizen Glory. It is an early cabbage, but still of large size, solid and of the best quality. It is one of the largest early cabbages we have seen, and may be set out as late as the last of July or first of August in this latitude, and will make large, fine heads for late fall or winter use. The great merit of this cabbage lies in the perfect uniformity of its growth. The plants are compact, have few outside leaves, can be planted close together, and will produce a very large crop.

Pkt., .10; oz., .40; ¼ lb., $1.50

Henderson’s Early Summer. A standard summer variety. We have the true stock.

Pkt., .10; oz., .40; ¼ lb., $1.25

Mammoth Rock Red. The largest heading of any of the red sorts, of deep rich color, and excellent quality.

Pkt., .10; oz., .40; ¼ lb., $1.25

Red Dutch for pickling or for salads.

Pkt., .10; oz., .40; ¼ lb., $1.25

Savoy Improved American. The finest flavored of all the cabbage family, large and solid.

Pkt., .10; oz., .40; ¼ lb., $1.25

Succession. A sure-headed, long-keeping variety, very similar to All Seasons, but maturing a little later. Heads deep and very firm.

Pkt., .10; oz., .40; ¼ lb., $1.25

Sure Head. A fine variety for main crop. A good shipper and sure header.

Pkt., .10; oz., .40; ¼ lb., $1.25

Warren’s Stone Mason. An improvement on the Stone Mason Drumhead; heads rounder, firmer and earlier; is an extra good keeper.

Pkt., .10; oz., .40; ¼ lb., $1.25

BRUSSELS SPROUTS

(Species of cabbage; cultivation the same)

German,—Rofen-Kohl French,—Chou de Bruxelles Spanish,—Berza de Brussels

One ounce will sow a bed of forty square feet, and produce about 3,000 plants

This is a delicious vegetable, superior to either borecole or spinach. The small, cabbage-like heads which grow upon the stem are much improved by a moderate frost. Sow in hotbeds in March or April, and in the open ground in May.

Dwarf Improved. Produces excellent, compact sprouts; very sure cropper.

Pkt., .10; oz., .20; ¼ lb., .75

CAULIFLOWER

German,—Blumenkohl Spanish,—Coliflor French,—Chou-fleur

One ounce of seed will produce 1,500 to 2,000 plants if sown in open ground, or about 3,000 in frames

To raise good Cauliflower there is nothing so essential to success as good seed. The best Cauliflower seed is very expensive, but it is worth to the grower ten times as much as cheap and carelessly grown seeds. The best results are obtained from using Snowball for main late crop, as well as for early use.

Early Cauliflower are difficult to raise and are not of the best quality, but when the plants are set out in July and the heads form in October, there is no difficulty in getting fine, large heads of first-class quality. The seed should be sown in open ground or cold frames about the middle of May or first of June, on good soil. When plants are large enough, transplant to rich, moist soil. These remarks refer to Snowball for main late crop, as well as for early use.

Henderson’s Early Snowball. This is undoubtedly the finest ever introduced. It is the earliest and produces beautiful snow-white heads of the most delicious flavor. The seed we offer is pure and genuine, and sure to prove satisfactory.

Pkt., .20; oz., $2.50

Extra Selected Dwarf Early Erfurt. The finest strain of the Erfurt Cauliflower; almost as early as the Snowball; grows about 15 inches high; producing very solid, pure white heads of the very finest quality; seldom fails to form a good sized head.

Pkt., .15; oz., $2.50

All kinds of Insecticides. Spray Pumps, Power Sprayers, etc., always on hand. Call and examine or write for catalogue and prices.

PULVERIZED SHEEP MANURE is an excellent fertilizer for Gardens and Lawns. It is entirely free from weed seeds. Put up in 50 and 100 pound bags.

CARROT

German,—Rhore French,—Carrotte Spanish,—Zanahoria

One ounce will sow 100 feet of drill; 3 pounds required for an acre

Carrots require a very finely pulverized soil to grow them to perfection. A good, light and well-enriched sandy loam is the best for this crop. For field culture, sow in drills 2½ feet apart, so as to cultivate by horse. Market gardeners sow in drills about 1½ inches apart and cultivate by hand. For early crops cover ¼ inch deep, and thin to 6 inches apart in the rows; for late, cover ¾ inch deep, and thin to 4 inches.

Danvers Half-Long. One of the heaviest croppers; roots dark orange color, 8 to 10 inches in length, and ending in a somewhat abrupt point; first class for all soils.  

Pkt., .10; oz., .20; ¼ lb., .60

Oxheart, or Guerande. Roots short and very thick, and intermediate between Scarlet Horn and Chantenay; color deep orange; fine grained.  

Pkt., .10; oz., .20; ¼ lb., .60

Large White Belgaian. Roots very large and smooth; grown exclusively for stock feeding. Grained.  

Pkt., .10; oz., .20; ¼ lb., .60

Improved Long Orange. The best known and most largely cultivated of any Carrot; excellent for stock or table use. Roots deep orange, 12 to 15 inches long.  

Pkt., .10; oz., .20; ¼ lb., .60

Pkt., .10; oz., .20; ¼ lb., .60

Cress or Peppergrass

German,—Areffe French,—Cresson Spanish,—Masuerzo

One ounce will sow 16 square feet, or 150 feet of drill

A popular salad, which should be sown early in the spring—very thickly in shallow drills—and at short intervals, for success, as it soon runs to seed.

Extra Curled. A small plant, having a fine pungent flavor, and used as a salad; may be cut two or three times.  

Pkt., .10; oz., .15; ¼ lb., .35

True Water Cress. Grows along the banks of ponds and streams, and is easily introduced, wholly unlike Extra Curled; leaves are quite large and thick; a fine salad, sold in immense quantities in the large markets in spring.  

Pkt., .10; oz., .60; ¼ lb., $1.25

CELERY

German,—Sellerie French,—Celeri Spanish,—Apio

One ounce will produce 3,000 plants

Sow seed the first or second week in April in hotbed or cold frame. As soon as the plants have attained a height of three inches transplant, setting them four inches apart. As fall approaches draw earth up to the plants, keeping the stalks well together. When well blanched it is ready for use. Some of the varieties, such as Golden Self-Blanching and White Plume, may be blanched by simply placing a board 12 to 15 inches wide on edge on each side of the row.

Giant Pascal. A strong grower and wonderful keeper. Quality very fine.  

Pkt., .10; oz., .50

Golden Self-Blanching. A self-blanching early golden-colored variety that is very popular.  

Pkt., .10; oz., .75

White Plume. A variety that can be more easily grown than any other, as it does not require high banking to blanch the stalks. Simply earthing up enough to keep the stalks together or by passing a string around each plant is sufficient.  

Pkt., .10; oz., .50

CHERVIL

One ounce will sow about 300 feet of drill

Cultivated like parsley. Sow thickly in May, in drills half an inch deep, one foot apart. Use while the leaves are young and tender.

Curled Chervil. The young leaves are used for garnishing, and flavoring soups.  

Pkt., .10; oz., .20; ¼ lb., .45
CORN - Sugar

German,—Welfchorn Spanish,—Maiz French,—Mais

One Half Pound will plant 50 hills; 12 Pounds will plant one acre in hills

Corn requires a good soil and a warm situation. Commence for first early by planting the early varieties about May 1, and if a continuous supply is wanted all summer, make plantings about two weeks apart from May 1 until the last of July, first planting early varieties, then later ones. Plant in rows 3 feet apart, and make the hills about the same distance apart in the rows. Five kernels in the hills are plenty. Cover about 1 inch deep for early and a little deeper for late. Thin to 3 plants in a hill. Add 6 cents per lb. and for each additional lb. to the same address add 1¢, if to be sent by mail.

Crosby’s Early. An early corn of large size and choice quality. It has long been a standard variety.

% lb., .20; 1 lb., .35; 2 lbs., .60; 12 lbs., $3.00

Early Red Cory. This variety is the favorite for first early.

% lb., .20; 1 lb., .35; 2 lbs., .60; 12 lbs., $3.00

White Cob Cory. This is an improvement over the Early Cory as the cob is white, which gives it a finer appearance. It is as early as the Early Cory and of excellent quality.

% lb., .20; 1 lb., .35; 2 lbs., .60; 12 lbs., $3.00

Golden Bantam. The fact that the grains of this variety are yellow is an indication of hardiness and its value for early planting and early maturity. It is a rapid grower, and produces ears measuring about 5 inches, but the smallness of ears is fully made up by the deliciously sweet flavor and tender quality of the corn when cooked. It is a fine variety for the home garden.

% lb., .20; 1 lb., .35; 2 lbs., .60; 12 lbs., $3.00

Bantam Evergreen. Later than the Golden Bantam. Ears 8 inches long. 12 to 14 rowed. Of a rich golden yellow color and fine quality.

% lb., .20; 1 lb., .35; 2 lbs., .60; 12 lbs., $3.00

Black Mexican. This corn when in condition for the table cooks remarkably white; but the ripe grain is black or bluish-black. It is surpassed by none in tenderness.

% lb., .20; 1 lb., .35; 2 lbs., .60; 12 lbs., $3.00

FIELD AND FODDER CORN

Prices will be quoted on application on the following corns. Please give the amount desired as well as the kind in all cases.

Beaming. An early, very heavy, long-eared corn. Grows to medium height with large amount of foliage. One of the best ensilage corns, very much relished by stock. Cob red, grain yellow.

Red Cob. A very large-growing white dent corn, with red cob. Fodder sweet, juicy and tender. Very popular in northern dairy districts.

Eureka. One of the tallest and best ensilage corns grown. Grows very tall and is very productive of ears and leaves. For the silo this corn is rarely equalled.
CORN (Continued)

Sanford. A well-known variety, adapted to the whole of New England. Kernels silvery white flint color; large and broad. An excellent fodder and ensilage corn.

Early Canada. An eight-rowed, yellow flint variety with small cob and deep grain. This is one of the earliest and best and seldom fails to produce a crop. The Early Canada seed we have to offer was grown in this State.

Prizetaker. A very large growing, yellow flint corn. Ears are eight-rowed, long, and the kernels deep and broad. One of the very best for ensilage as it ears out well.

CUCUMBER

German,—Gurfe
French,—Concombre
Spanish,—Pepino

One ounce will plant 50 hills; 2 pounds will plant an acre

Cucumbers being a tender annual should not be planted out of doors until all danger from frost is passed and the ground is warm. They succeed best in warm, moist, rich loamy soil. The hills should be 3 to 4 feet apart and the plants thinned to four of the strongest to a hill.

Extra Early Russian. Earliest variety known; hardy and productive. Fruit very small and quality fine for pickling and slicing.

Pkt., .10; oz., .20; ¼ lb., .60

Early Cluster. Fruit borne in pairs; light green; a great bearer.

Pkt., .10; oz., .20; ¼ lb., .60

Early Fortune. An early variety, very productive, and of large size. Dark green in color which does not fade. The shape is uniform and the quality very fine.

Pkt., .10; oz., .20; ¼ lb., .60

Boston Pickling. Fruit short, smooth and pointed at each end, bright green and a great yielder; one of the best pickling.

Pkt., .10; oz., .20; ¼ lb., .60

Early Frame or Short Green. An excellent sort, both for table use and for pickling.

Pkt., .10; oz., .20; ¼ lb., .60

White Spine Improved. The most popular strain of White Spine, and for general out-door culture, the best.

Pkt., .10; oz., .20; ¼ lb., .60

Long Green Improved. Fine for pickling when small; good for table use when about half grown.

Pkt., .10; oz., .20; ¼ lb., .60

Japanese Climbing. Vines are extra strong and foliage much more vigorous than other kinds, and being a climbing sort, can be grown on trellises, etc., saving much valuable space in small gardens. It is very prolific, from forty to fifty cucumbers having been counted on single plants. Fruit cylindrical, about ten inches long, thick and of fine flavor.

Pkt., .10; oz., .20; ¼ lb., .60

Pkt., .10; oz., .20; ¼ lb., .60
DANDELION

German,—Lowenzahn
French,—Pissenlit
Spanish,—Amargon

One ounce will sow 100 feet of drill

The Dandelion resembles endive, and affords one of the earliest as well as one of the most healthful spring greens. Sow as early as the weather will permit, in good, well-enriched soil, in rows 12 inches apart, covering seed \( \frac{1}{4} \) of an inch deep, and firming the soil well over them. Thin to two or three inches apart in the rows; by so doing the roots will be larger and a great amount of time will be saved the next spring in trimming or gathering the crop. One pound per acre is sufficient.

Improved Thick-Leaved. Cultivate for spring greens; an immense improvement on the common dandelion, both in size and thickness of its leaves and fine flavor, being far less bitter. Pkt., .10; oz., .75; ¼ lb., $2.50

ENDIVE

German,—Gendive
French,—Chicoree
Spanish,—Endivia

One of the most refreshing and attractive of all autumn and winter salads. Sow seed from the middle of June until the end of August.

Moss Curled. More finely curled, and a heavier and more dense plant than Green Curled. Pkt. .10; oz., .20; ¼ lb., .75

Broad-leaved Batavian (Escarole). This variety is chiefly used in soups and stews; requires to be tied up in blanching. Pkt., .10; oz., .20; ¼ lb., .75

KALE or BORECOLE

German,—Blatter-Kohl
French,—Chou Vert
Spanish,—Breton

One ounce will produce 3,000 plants

Sow from the middle of April to the beginning of May in prepared beds; transplant in June, and treat in the same manner as for cabbage. Of all the cabbage tribe this is the most tender and delicate. The varieties are all extremely hardy, and are best when touched by frost.

Tall Curled Scotch. Plants of this variety grow two to three feet in height, bearing long, plume-like, light green leaves which are much cut and deeply curled at the edges. Very hardy. Pkt., .10; oz., .20; ¼ lb., .75

Dwarf Green Curled Scotch. Rarely exceeding 18 inches in height, but spreading out under good cultivation to 3 feet in diameter; leaves beautifully curled and bright green. Pkt., .10; oz., .20; ¼ lb., .75
KOHL RABI

German,—Rohl-Rab
French,—Chou-Rave
Spanish,—Col de nabo

One ounce will sow 200 feet of drill

This vegetable, the popularity of which is rapidly increasing, combines the virtues of the turnip and cabbage, but excels both in nutritive, hardy and productive qualities. The seed may be sown in June in rows 18 inches apart, and the plants thinned out to eight or ten inches in the rows.

Purple Vienna. A little later than the White; color bluish purple. Pkt., .10; oz., .25; ¼ lb., .75

Large Green or White. Good for table and also for feeding stock. Pkt., .10; oz., .25; ¼ lb., .75

LETTUCE

German,—Lattich
French,—Laitue
Spanish,—Lechuga

One ounce will sow 120 feet of drill

Requires a rich, moist soil, and to be crisp and tender needs to be grown in cool weather. For winter use, sow in hotbeds every two weeks, at the rate of one ounce of seed to four sashes (a sash is three feet long by six feet wide); cover very lightly, and transplant, first to three inches apart each way, afterward to eight inches. For garden or field, sow in rows, cover one-fourth of an inch deep and thin out to 12 inches apart in the rows. For New England the White Seeded Tennisball for cultivation under glass, and the Black Seeded Tennisball for outdoor use are the standard varieties.

Big Boston. A most desirable variety, either for forcing in cold frames or open ground planting; always produces large, solid, saleable heads.

Pkt., .10; oz., .20; ¼ lb., .60

May King

May King. Probably the finest all-seasons lettuce yet introduced. It is very early and hardy, and will stand cold, damp weather better than many varieties. Planted out of doors or under glass it will produce fine solid heads much sooner than any other variety. Outer leaves are yellowish green, tinged with brown, while the inside is a rich yellow.

Pkt., .10; oz., .20; ¼ lb., .60

Boston Curled. Of ordinary quality but great beauty; highly ornamental in growth with its frilled leaves.

Pkt., .10; oz., .20; ¼ lb., .60

Prize-Head Early. Leaves green and red, very thin, crisp and tender. One of the best for private use.

Pkt., .10; oz., .20; ¼ lb., .60

Tennisball, Black-Seeded. A very popular sort for open-ground culture; forms a handsome head, and is crisp and tender.

Pkt., .10; oz., .20; ¼ lb., .60

Simpson Early Curled (White Seed). A leading early sort for forcing or open ground.

Pkt., .10; oz., .20; ¼ lb., .60

Tomhannock. A variety with upright leaves, beautifully wrinkled, edges of outer leaves have reddish tinge; one of the best.

Pkt., .10; oz., .20; ¼ lb., .60

Iceberg. A large, late, cabbage heading variety. Heads very firm and well blanched. Color, medium green.

Pkt., .10; oz., .20; ¼ lb., .60

Hanson. Large, solid heads; tender, crisp and of a fine flavor.

Pkt., .10; oz., .20; ¼ lb., .60

Use one of our Garden Seeders and save seed, get a more uniform growth and larger crops.
LEEK

German,—Lanch French,—Poireau
Spanish,—Puerro

One ounce will plant 200 feet of drill

The leek is very hardy and easily cultivated; it succeeds best in a light but well-enriched soil. Sow as early in the spring as practical in drills one inch deep and one foot apart. When six or eight inches high they may be transplanted in rows ten inches apart each way as deep as possible, that the neck, being covered, may be blanched.

American Flag Pkt., .10; oz., .25; ¼ lb., .75

MELON, MUSK

German,—Melone French,—Melon d'Eau
Spanish,—Melon

One ounce will plant about 50 hills (2 to 3 pounds in hills) per acre

Melons thrive best in a light, rich soil. Plant early in May, when the ground has become warm and dry, in hills six feet apart each way for Muskmelons; eight feet for Watermelons. Previous to sowing the seed mix a few shovelfuls of well-rotted manure in each hill, and plant in each twelve to fifteen seeds; after all danger of bugs is over, thin out to three plants per hill. When about one foot long, pinch off the tips to make them branch, as it strengthens the growth of the vines and makes the fruit mature earlier. Feed liquid manure occasionally. A few hills for early use may be had by sowing on pieces of sod in a hotbed, and when warm enough transplant to open ground.

Emerald Gem Melon. The Emerald Gem is entirely unlike any other muskmelon yet introduced. The melons are about the size of the Netted Gem, but unlike that variety, the skin, while ribbed, is perfectly smooth, and of very deep emerald green color. The flesh which is thicker than any other native melon of the size, is of a suffused salmon color, and ripens thoroughly to the thin green rind, which is distinctly defined. The flesh is peculiarly crystalline in appearance, and so very juicy, sweet and rich that it almost drops to pieces. It matures very early and is quite productive.

Pkt., .10; oz., .20; ¼ lb., .50

Long Yellow Musk. A long, large melon with a musky flavor; rich, yellow color, both inside and out.

Pkt., .10; oz., .20; ¼ lb., .50

Rocky Ford. This new Musk melon is similar to the royal strain of Netted Gem. The strain here offered originated with the melon growers in the vicinity of Rocky Ford, Col., who have shipped this melon from that distant Western point to Eastern markets. The melons grown by them are so fine in quality as to outsell all others, and the demand for such melons has been far beyond the supply.

Pkt., .10; oz., .20; ¼ lb., .50

Early Hackensack. An improvement over the old Hackensack, producing melons of as good quality and ten days earlier. Large fruit with thick, green flesh of the finest flavor.

Pkt., .10; oz., .20; ¼ lb., .50

MELON, WATER

German,—Waffermelone French,—Melon d'Eau
Spanish,—Zandia

One ounce will plant 50 hills

Prices on all varieties of Watermelons as follows:

.10 per pkt.; .15 per oz.; ¼ lb., .40.

Cole's Early. An excellent variety. One of the earliest. Hardy, medium size, nearly round, dark green, striped a lighter shade; flesh deep pink.

Phinney's Early. This is another early melon of fine quality; suitable for growing in New England. Medium size, oblong in form, mottled green; flesh bright scarlet and very sweet.

Citron for Preserves. The old and well-known Preserving Citron; seeds red.
MUSTARD

German,—Senf
French,—Moutarde
Spanish,—Mostaza

One ounce will sow 75 feet of drill

As an ingredient, the green Mustard imparts a delightfully pungent flavor to the various forms of prepared salads. For early crops the seed may be sown in a hotbed in March, and for general crop at frequent intervals through the spring, in drills from eight to twelve inches apart.

White London. Considered the best for salads and spinach; leaves light green. It is best when about four inches high. Oz., .10; ¼ lb., .15

ONION

German,—Zwiebel
French,—Ognon
Spanish,—Cabolla

Select the cleanest, richest land on the farm for the Onion crop. If onions were grown on the land the previous year, so much the better, but any good corn or potato land will do. Broadcast fifteen to twenty cords of fine, well-rotted manure to the acre and plow not deeper than six inches; harrow thoroughly, cross plow, and harrow again, after which hand rake with wood rake and remove stones and rubbish. Sow four to five pounds of seed per acre in drills twelve to fourteen inches apart and about one-half inch deep. See that the Seed Drill is equipped with a good roller that will press the earth firmly upon the seed. Sow as early in the spring as the ground can be properly worked. There is seldom necessity for thinning Onions if the land has been properly manured and seeded. After the Onions are three to four inches high, an application of about five hundred pounds to the acre of fertilizer, rich in available nitrogen, strewn between the rows, will be very beneficial. Keep the Onions growing by never allowing the weeds to get ahead and the acre should produce in a good average season, five hundred to seven hundred bushels. When the tops are down, the Onions may be pulled and left on the ground, and should be frequently turned with a wooden rake until tops are dried.

ONION SETS

Onion sets should be planted as early in the spring as convenient to obtain early green onions, but they may be set at any time up to June 1. Set in rows a foot apart and three to four inches between them in the row. Any good soil will suit them. When grown in quantities, high cultivation is given in order to forward the crop for an early market. They are ready for use as soon as the bulbs begin to be of fair size. Those not used in green condition will ripen early in July and make nice onions. Potato and Top onions are grown from bulbs only.

Potato Onion Sets..................................lb., .30; 8 lbs., $1.75
Red Bottom Sets ..................................lb., .30; 8 lbs., 1.75
White Bottom Sets............................lb., .30; 8 lbs., 1.75
Yellow Bottom Sets............................lb., .30; 8 lbs., 1.75
Top Sets ........................................lb., .30; 8 lbs., 1.75

Yellow Globe Danvers. Undoubtedly the best known and most popular of all onions; the earliest yellow variety; is entirely free from stiff necks. Globular in shape; has a small top. It is the most productive onion grown.

Pkt., .10; oz., .40; ¼ lb., $1.00

Large Red Wethersfield. We have a very fine and select strain of this sort. Color is deep purplish red, flesh white, moderately grained and very firm. Yields enormously and is one of the best winter keeping onions.

Pkt., .10; oz., .40; ¼ lb., $1.00

White Portugal, or Silverskin. A large, flat, white onion of mild and pleasant flavor; hard and fine grained, and a good keeper. Extensively sown for sets, and is also largely grown for pickling.

Pkt., .10; oz., .40; ¼ lb., $1.00

Prize-Taker. A globe-shaped variety of delicate straw color, growing to a very large size. It ripens up hard and firm, the flesh being pure white. Fine grained and of fine, mild, delicate flavor.

Pkt., .10; oz., .40; ¼ lb., $1.00

Buy one of our Garden Seeders. You can save the price of it in one season in time and seed. It is the most economical of seeders made. Send for catalog and prices.
**PEAS**

German,—Erbren  
French,—Pois  
Spanish,—Guizante

One pound for 50 feet of drill; one to two bushels in drills for an acre.

Peas come earliest to maturity in light, rich soil. For general crop, a deep loam or a soil strongly inclined to clay is best. For early crops decomposed leaves or leaf-mold should be used; or, if the soil is very poor, strong manure may be used. For general crops a good dressing should be applied, and for the dwarf-growing kinds the soil can hardly be too rich. When grown as a market crop, peas are never staked; for private use they are generally sown in double rows, and the tall varieties staked up by brush. For an early crop sow as soon as the ground can be worked, and make repeated sowings every two weeks for succession. After the first of June, sowing should be discontinued until the middle of August, when a good crop may sometimes be secured by sowing an extra-early sort for fall use.

If sent by mail add .08 per lb.; and for each additional lb. to the same address, add .01.

All marked thus (*) indicate wrinkled varieties.

---

**Extra Early Dwarf Varieties**

*Notts Excelsior.* This is the earliest dwarf wrinkled pea. The plant is dwarf and needs no support. The pods are of good size and well filled with large peas of the finest quality. It is as early as the American Wonder, while the vines are much more productive and the pods of larger size. There is no better early dwarf pea. Fifteen inches.

Lb., .35; 2 lbs., .60; 14 lbs., $3.50

*Sutton’s Excelsior.* Ripens early on vines fourteen to sixteen inches high, covered with a great abundance of long, straight, broad pods of a pale green color.

Price .................Lb., .35; 2 lbs., .60; 14 lbs., $3.50

*Laxtonian.* One of the best dwarf wrinkled peas for the market gardener. Pods about 4 inches long, resembling those of Gradus, but ripening a little earlier. Vines productive and vigorous; average height less than 18 inches.

Lb., .35; 2 lbs., .60; 14 lbs., $3.50

*Pioneer.* An improvement on the popular Laxtonian. Vines about 20 inches high; color, light green.

Vigorous growth. The pods pointed and a little darker in color than the vine. Considered fully four days earlier than the Laxtonian.

Lb., .35; 2 lbs., .60; 14 lbs., $3.50

Lb., .35; 2 lbs., .60; 14 lbs., $3.50

*Peter Pan.* One of the very finest of the large podded dwarf variety of the Laxtonian class, though somewhat earlier. Vines 15 inches. Pods straight and pointed. Quality best.

Lb., .35; 2 lbs., .60; 14 lbs., $3.50

**Extra Early Variety Not Dwarf**

*Alaska.* An extra early round pea bearing pods of a dark green color; two feet.

Lb., .35; 2 lbs., .60; 14 lbs., $3.50

*Gradus or Prosperity.* It combines the finest quality with extreme earliness, and is also productive, bearing pods fully as large as Telephone. The color of the shelled peas is a beautiful light green, which color they retain after being cooked; the quality and
PEAS (Continued)

flavor delicious, and the peas remain tender and sweet for a long time.

Lb., .35; 2 lbs., .60; 14 lbs., $3.50

*Sutton’s Excelsior

*World’s Record. An improved type of Gradus, being slightly earlier, more dwarf and very productive. Height, 2 feet. Pods medium green, 4 inches long. Very fine quality.

Lb., .35; 2 lbs., .60; 14 lbs., $3.50

*Thomas Laxton. One of the very best of the tall growing, large pod, early peas. The plant is a very hardy and strong grower, producing extra large pods in abundance. The quality is delicious and cannot be surpassed by any other variety. The “Thomas Laxton” will mature nearly as early as any of the extra early smooth peas, and being a wrinkled sort is much sweeter.

Lb., .35; 2 lbs., .60; 14 lbs., $3.50

*Early Morn. One of the earliest and most productive. The pods are very large and well filled. Very fine flavor.

Lb., .35; 2 lbs., .60; 14 lbs., $3.50

Second Early Varieties

*Telephone. A pea of the finest quality, sweet and delicious. Medium late, growing four feet tall with pods of the largest size.

Lb., .35; 2 lbs., .60; 14 lbs., $3.50

*Bliss Everbearing. Medium late and very productive. Two feet tall.

Lb., .35; 2 lbs., .60; 14 lbs., $3.50

*Dwarf Telephone (Carter's Daisy). Similar to the Tall Telephone except in the height of the vine, which is only about two feet.

Lb., .35; 2 lbs., .60; 14 lbs., $3.50

Late Variety for General Crop

*Champion of England. The standard for quality. Grows four feet tall, very prolific, and still one of the best late peas.

Lb., .35; 2 lbs., .60; 14 lbs., $3.50

White Marrowfat. A good late sort. Cultivated very extensively for the summer crop.

Lb., .25; 2 lbs., .45; 15 lbs., $2.40

Black-Eyed Marrowfat. An old and standard late variety for garden or field use.

Lb., .25; 2 lbs., .45; 15 lbs., $2.40

Canada Field. Seeds small white; for field culture only; largely used for sowing among oats. Price

Lb., .10; 15 lbs., $1.35

PUMPKIN

German,—Kurbis
French,—Potiron
Spanish,—Cabbage
One ounce will plant 20 hills

Pumpkins are grown chiefly as food for stock. The usual method of planting is to scatter a few seeds at

Sugar Pumpkin

intervals in the hills when planting Indian corn; in this way good crops of pumpkins are secured with
PUMPKINS (Continued)

slight labor and expense, and make a valuable addition to the season's crops.

Connecticut Field. The common yellow pumpkin grown chiefly for feeding stock.

Pkg., 10; oz., .15; ¼ lb., .30; lb., $1.00

Sweet or Sugar. A small variety, fine-grained and sweet; the best for table use.

Pkg., .10; oz., .15; ¼ lb., $1.25

Abbott's Improved Hollow Crown. Smooth and quite large; fine sort.

Guernsey. Roots not quite so long as Hollow Crown, but of greater diameter and more easily gathered.

Long Smooth. As name implies, very smooth, free from roots, and a general favorite.

PEPPER

German,—Pfeffer French,—Piment
Spanish,—Pimiento

One ounce will produce 2,000 plants

Grown largely for pickles. Sow in hotbeds early in April, and transplant to the open ground when the weather is favorable. They should be planted in warm, mellow soil in rows 18 inches apart. They may also be sown in the open ground when danger of frost is past.

Large Bell, or Bull Nose. A favorite and well-known pickling sort. Is early, large, mild and thick skinned.

Pkt., .10; oz., .50

Long Red Cayenne. A small, long, bright red sort, very productive; extremely strong and pungent.

Pkt., .10; oz., .75

SPINACH

German,—Spinat French,—Epinard
Spanish,—Espinaca

One ounce for 100 feet of drill; 10 to 12 pounds in drills for an acre

Sow in drills as early in spring as the weather will admit, fifteen inches apart, covering half an inch deep. When well up, thin out to five or six inches apart in the rows. Unlike carrots, they are improved by frost, and it is usual to take up in the fall a certain quantity for winter use, leaving the rest in the ground till spring, to be dug as required.

Prices on all varieties of parsnips as follows:

Pkt., .10; oz., .20; ¼ lb., .50; prices in quantity on application.
SPINACH (Continued)

This is a very important crop in our market gardens, and is one of the most easily managed of all vegetables, requiring but little culture, and may be had fit for use the entire season. The main crop is sown in September. It is sometimes covered up in exposed places with straw or salt hay during winter, which prevents it from being cut with frost; but in sheltered fields there is no necessity for covering. For summer use it may be sown at intervals of two or three weeks from April to August. Spinach is best developed and most tender when grown in rich soil.

King of Denmark. A fine long season variety remaining longer than most varieties before going to seed; leaves large, crumpled and blistered. Deep green color. Pkt., .10; oz., .15; ¼ lb., .25; lb., .75

Long Standing Thick Leaved. Stands longest before running to seed; dark green. Pkt., .10; oz., .15; ¼ lb., .25; lb., .75

Giant Thick Leaf. This variety gives the best results. The leaves are large, thick and somewhat crumpled, and it is equally good for spring or autumn sowing. Pkt., .10; oz., .15; ¼ lb., .25; lb., .75

New Zealand. A valuable variety for the garden as it produces the thick, tender leaves throughout the summer. Grows very large and luxuriantly in warm, rich soil.

Pkt., .10; oz., .20; ½ lb., .50; lb., $1.75

RADISH

German.—Rettig, Rabies Spanish.—Rabano
French.—Radis, Rave, Petite Rave

One ounce will sow 100 feet of drill

Culture. The soil for Radishes should be very rich, light and mellow, well broken by digging, as their tender and mild qualities depend very much upon their rapid growth. For very early use sow in hotbeds in February and March and in the open air as soon as the ground can be worked, at intervals of ten or twelve days for a succession as long as they may be wanted. The winter varieties should be sown in August, lifted before severe frost, and stored in the cellar.

Pkt., .10; oz., .20; ½ lb., .50; lb., $1.50

Long White Vienna. Of rapid growth and beautiful shape; skin and flesh snow-white. The finest of long white radishes.

Pkt., .10; oz., .20; ½ lb., .50; lb., $1.50

China Rose. Bright rose-colored skin; flesh white and quality excellent; one of the best for fall and winter use.

Pkt., .10; oz., .20; ½ lb., .50; lb., $1.50

Early Scarlet Turnip. A well known and popular variety. Small top of quick growth, mild and crisp.

Pkt., .10; oz., .20; ½ lb., .50; lb., $1.50

Early Scarlet Turnip, White Tipped. One of the handsomest of the turnip radishes and a great favorite in many large markets for early planting outdoors. Roots slightly flattened on the under side; color, very deep scarlet with a white tip; flesh white and of the best quality.

Pkt., .10; oz., .20; ½ lb., .50; lb., $1.50

Vick's Scarlet Globe Radish

Pkt., .10; oz., .20; ¼ lb., .50; lb., $1.50

Crimson Giant Forcing. Best of forcing sorts. Grown larger than other turnip shaped varieties and fine eating.

Pkt., .10; oz., .20; ¼ lb., .50; lb., $1.50

For the Lawn, PURITY LAWN SEED IS BEST
RADISHES (Continued)

Long Scarlet. Short top. The standard variety of the long sorts, used either for forcing or open culture; six or seven inches long.

Pkt., .10; oz., .20; ¼ lb., .50; lb., $1.50

Long Black Spanish. Long black, flesh white and slightly pungent; one of the latest and hardest.

Pkt., .10; oz., .20; ¼ lb., .50; lb., $1.50

Round Black Spanish. Skin black, white fleshed and piquant flavor.

Pkt., .10; oz., .20; ¼ lb., .50; lb., $1.50

SALSIFY or Oyster Plant

German,—Bocksbart French,—Salsifs
Spanish,—Ostra Vegetal

One ounce will sow 50 feet of drill

Culture. Sow the seed in light, deep soil, early in the spring, in drills twelve inches apart and one inch deep, thinning out the young plants to four or five inches. The roots will be ready for use in October, when a supply should be taken up and stored, like carrots. Those remaining until spring should be dug up before commencing their growth.

Mammoth Sandwich Island. We consider this the largest and most profitable salsify in cultivation. It is pure white in color and invaluable to market gardeners.

Pkt., .10; oz., .25; ¼ lb., .75

TOMATO

German,—Liebsapfel Spanish,—Tomate

In this latitude to produce extra early tomatoes the seeds should be planted in the hotbed about the middle of February, in drills five inches apart, and not over one-half inch deep.

For ordinary plants, sow the seed early in March.

When the plants are two inches high they should be transplanted three to four inches apart. The final transplanting to the open ground may be made the last of May, when the plants should be fine, large and stocky, and if sufficient soil is taken up with each plant, they will keep right on growing with no setback.

Red Head. An early variety, bright red in color, round and smooth, uniform in size and with an excellent flavor.

Pkt., .10; oz., .40

Earliana. It is remarkable for its earliness, very large size, handsome shape and bright red color. Its solidity and fine qualities are equal to the best medium and late sorts.

Pkt., .10; oz., .40; ¼ lb., $1.25

Chalk's Early Jewel. This is a very productive variety. Ripens nearly as early as Spark's Earliana, but is more desirable for home use as the fruits are thicker through and more solid; borne in large clusters. Color bright scarlet and quality good.

Pkt., .10; oz., .40; ¼ lb., $1.25

For the Lawn

PURITY LAWN SEED

IS BEST
SQUASH

German,—Kurbiss
French,—Courge
Spanish,—Calabaza

One ounce Early will plant 50 hills; one ounce Marrow, 25 hills

Culture. The plants are very tender and sensitive to cold, and planting must be delayed until settled warm weather. The general principles of culture are the same as those given for cucumbers and melons, but the plants are less particular as to soil. The summer varieties should be planted four feet apart each way, and the winter sorts eight feet. Three plants are sufficient for a hill. Care should be taken not to break the stems from the squashes intended for winter use, as the slightest injury will increase the liability to decay.

Improved Hubbard. The well-known and standard late variety; our strain is excellent.

Pkt., .10; oz., .15; ¼ lb., .50; lb., $1.50

Golden Hubbard. A genuine Hubbard Squash except in color, which is a bright red; quality excellent.

Pkt., .10; oz., .15; ¼ lb., .50; lb., $1.50

Pkt., .10; oz., .15; ¼ lb., .50; lb., $1.50

Blue Hubbard. A new type of Hubbard Squash said to excel all others in quality. Growth and habit same as Hubbard, but with a bluish-gray color.

Pkt., .10; oz., .15; ¼ lb., .50; lb., $1.50

Giant Summer Crookneck. Double the size of an ordinary Crookneck and very warty, but similar in other respects. Their handsome appearance commands an extra price in the market.

Pkt., .10; oz., .15; ¼ lb., .50; lb., $1.50

Delicious. We have found in this squash all that the originator claims for it. It is the driest, sweetest and finest flavored squash we have ever tasted. A fall and winter squash and is a good keeper.

Pkt., .10; oz., .15; ¼ lb., .50; lb., $1.50

Boston Marrow. Fine fall variety; oval, bright orange; flesh yellow and firm; best for pies, and also for canning. Pkt., .10; oz., .15; ¼ lb., .50; lb., $1.50

Early White Bush Scalloped. A standard summer variety; good either for home or market garden.

Pkt., .10; oz., .15; ¼ lb., .50; lb., $1.50

TOBACCO

Connecticut Seed Leaf. Best adapted for the climate of the Northern and Middle States.

Pkt., .10; oz., .30

TURNIP

German,—Steckrube
French,—Navet
Spanish,—Nabo Comun

Turnips may be sown at all seasons from April to August in our climate, although those will be the best which are sown very early in spring for summer crops, and early in August for a fall and winter crop. A light soil, well manured the previous year, is the best. A few hundred pounds per acre of quick-acting fertilizer will have a tendency to make the roots smooth, and to make the rapid growth so essential in producing sweet and palatable turnips.
TURNIPS (Continued)

Extra Early Purple Top Milan (Flat). The earliest turnip in cultivation and a splendid variety; favorite with gardeners who want first turnips in market. Bulb white, flat, of medium size, with a bright purple top; one of the sweetest and finest flavored of summer sorts.

Pkt., .10; oz., .20; ¼ lb., .60; lb., $2.00

Extra Early White Milan. This is one of our most popular turnips for spring sowing. It is a splendid extra early turnip in which the extreme earliness, small top and tap-root of the Purple Top Milan is united with clear white skin and flesh.

Pkt., .10; oz., .20; ¼ lb., .60; lb., $2.00

Purple Top Strap Leaf. Rapid grower and mild flavor. The most popular variety for early use, either for the table or stock.

Pkt., .10; oz., .15; ¼ lb., .40; lb., $1.00

Yellow Stone. A very popular yellow-fleshed variety, fine for table use. Flesh very firm, tender, sweet and fine flavored; an excellent keeper.

Pkt., .10; oz., .15; ¼ lb., .40; lb., $1.00

White Egg. Belongs to the class of quick-growing fall turnips, and for this purpose should be sown in this latitude between August 1 and 10. Its shape is nearly oval or egg, as its name would indicate.

Pkt., .10; oz., .15; ¼ lb., .40; lb., $1.00

Long Island Purple. Undoubtedly the finest variety of purple-top Ruta Baga. Leaves few and small; bulbs fine shaped with very short, small necks; purple crown, skin and flesh bright yellow, solid, sweet and mild flavor.

Pkt., .10; oz., .15; ¼ lb., .40; lb., $1.25

White Sweet German. Sweet, and fine flavor. Good keeper.

Pkt., .10; oz., .15; ¼ lb., .40; lb., $1.25

Skirving's Purple Top. Well-known, yellow fleshed variety of large size and fine quality; for stock or table.

Pkt., .10; oz., .15; ¼ lb., .40; lb., $1.25

Imperial Hardy Swede. Claimed by many to be the best Swede turnip grown. Bulb of large size with purple crown; flesh yellow; very smooth and heavy cropper.

Pkt., .10; oz., .15; ¼ lb., .40; lb., $1.25

Vegetable and Flower Plants

We have in their season a choice assortment of both vegetable and flower plants.

Tomato Plants. Dwarf Champion, Chalk's Jewel, Earliana, etc.

Cabbage Plants. All Seasons, Stone Mason, Drumhead, Danish Ball Head, Early Summer, etc.

Cauliflower. Snowball.

Flower Plants. Pansies, Verbenas, Stocks, Salvia, Asters, Zinnias, Phlox.

Our Plants are all grown for us locally and are hardy and vigorous. Prices as low as can be made and furnish good, strong, healthy plants.

Bird Seed

Add 8c per lb., each additional lb. add .01 for postage. Prices subject to variations of the Market.

Canary. Sicily, selected Sunflower. Russian Hemp. Russian, first quality Millet
Rape. Cuttle Fish Unhulled Rice
NOTE—Owing to the frequent changes in price of Grains and Grasses we have refrained from inserting prices of them in this catalogue. The lowest market prices will be quoted on application.

Special Attention

While we carry several grades of the different varieties of seeds, we recommend our Purity Brand as the very best the market affords. These seeds are strictly Northern grown, and are selected by us because they possess the two essential qualities of purity and vitality. It is well known that there have been large quantities of Grass and Clover Seed sold as pure, which official analysis has shown to contain large percentages of adulteration. This not only defrauds the planter by selling him a worse than useless article, but inflicts injury also by filling his land with noxious weeds. We list Grass and Clover Seed according to their quality, grading down from our Purity Brand, which is always the best.

*To 50 gallons of water.

The above recommendations are condensed and are somewhat subject to change depending upon conditions in various sections of the country.

Where an effective combination Insecticide and Fungicide is desired, "Borde-Arsenate" used at same strength as indicated for Dry Powdered Arsenate of Lead will give splendid results. Dry Powdered Bordeaux Mixture can be used as a dry dust just as it comes from the package or in combination with equal quantities of Dry Powdered Arsenate of Lead or Arsenate of Calcium. When using Dry Powdered Bordeaux Mixture as a wet spray use from three to five pounds to fifty gallons of water for the control of most fungus diseases.

Dry Powdered Insecticides can be used for dry dusting just as they come from the package.

#### ADVISED DUSTING SCHEDULE FOR APPLES

**Time:**

1. Late winter
   - Spring
2. Prepink Bud: 7 to 10 days before pink bud—just as the blossom buds commence to swell
3. Pink Bud: Just as the buds begin to show pink
4. A. In season where a period of over 5 days elapses between Pink and Calyx applications apply Kolodust. This will not injure bloom or bees and will give protection against Scab.
5. C. In season when early scab is of interest.
6. About July 5-15

**Material:**

- Dormant dust
- soluble sulphur compound or Emulso Oil for liquid spray

**To Control:**

- Scale and early scab
- Apple scab

**NOTES**

(A) In damp season on varieties like McIntosh Reds and R. I. Greenings susceptible to apple scab apply a light dusting every 10 days, making 100 lbs. of "Kolodust" cover 200 trees 20 yrs. of age.

(B) After Aug. 20th use "Kolodust;" it contains no poison, and is cheap protection from apple scab and sooty blotch.

(C) Railroad Worm. Trap to find date of emergence and dust immediately with Kolokil. This period usually first or second week in July. Repeat again in 14 days.

**QUANTITY TO USE**

For 20 yr. old trees use about 1 lb. Kolodust, Kolotex or Kolokil. Smaller or larger trees in proportion.

APHIS. In case of heavy infestation of aphis, use A-1 according to severity of infestation.

For schedule on cherries, pears and grapes see our bulletin "When and How to Dust."

</tbody>
</table>

Arsenate of Lead Powder
Arsenate of Lead Powder kills most leaf-eating insects like Potato Bugs, Canker Worms, Elm Leaf Beetle, Gypsy and Brown Tail Moths, Potato Beetle and similar insects that feed on the foliage.

Arsenate of Calcium Powder
The use of Arsenate of Calcium Powder as a stomach poison for controlling leaf-eating insects has become more general each year.

Bordo-Arsenate Powder—The Two-in-One Spray
This product combines the killing properties of Arsenate of Lead and the fungus preventative qualities of Bordeaux Mixture.

Dry Powdered Bordo-Arsenate being a scientific combination of Arsenate of Lead and Bordeaux Mixture will control both external leaf-eating insects and fungus diseases at the same time. It is prepared in dry powdered form which is a decided advantage over the old form of paste products.

Fungi Bordo or Bordeaux Mixture Powder
Bordeaux Mixture Powder can be used wherever paste Bordeaux Mixture has been used heretofore. It is splendidly adapted for both fruit trees and truck crop work, and can be used in combination with any insecticide, either as a dry or a liquid spray.

Lime-Sulphur Powder
Lime-Sulphur Powder is an improved standard spray material. Safe and effective, not only as a dormant spray, but also as a summer spray in combination with Arsenate of Lead. Tested by experiment stations and found superior to all dry compounds on the market, in safety and effectiveness. It will control San Jose Scale and many other scale insects. It is effective against Leaf Blister Mite, Peach Leaf Curl, Apple Scab and Brown Rot of cherries and plums.
Paris Green

Paris Green is the oldest and most widely-used spray poison on the market. As a spray on potatoes against "bugs" it has no peer.

Paris Green kills quickly on account of its high arsenic content and will not burn the foliage of potatoes because of its low percentage of water soluble arsenic.

Carbola

Carbola is a white paint in powder form combined with a disinfectant twenty times stronger than carbolic acid. It is neither poisonous nor caustic. It is ready to use as soon as mixed with water — no waiting or straining. It can be applied with a brush or spray pump to wood, brick, stone, cement, plaster-board, etc., or over whitewash.

Carbola will not clog the sprayer. It does not blister, flake or peel off. It dries out white with a smooth finish. It doesn't spoil by standing, even after it is mixed with water. It has no disagreeable odor. Its use will increase the light, improve the appearance and help make buildings clean, sweet-smelling and sanitary. It paints and disinfects at one operation, and is recommended for use

Instead of Whitewash and as a Disinfectant

Powdered Hellebore

For use against leaf-eating insects such as rose slugs, currant worms, cabbage worms and many other leaf-eating insects where mild poison is required, as Powdered White Hellebore. Not mailable.

Price, 1/2 lb., .25

P. A. C. FORMALDEHYDE

Prevents and Eradicates Stinking Smut of Wheat

Grain Smut prevails wherever oats and other grains are grown. Potato Scab is also more prevalent each year. Never plant potatoes without treating the seed with Formaldehyde.

For Oat, Wheat and Rye Smut (except loose smut of wheat and barley which this preparation will not control) spread the seed on the floor, sprinkle with P. A. C. Formaldehyde, 1 pound (1 pint) to 36 gallons of water, and shovel over to mix thoroughly, after which spread out and dry.

For Potato Scab, and to destroy other germs on seed potatoes, soak two hours in P. A. C. Formaldehyde, 1 pound to 15 gallons of water. Price, 1 lb. tins, $ .45

Kerosene Emulsion is an article of wide and varied usefulness. It kills the green plant louse scale and many other sucking insects at once.

Many kerosene emulsions are prepared from kerosene, a cheap grade of hard soap and water. Emulsions so made are less efficient than Sterlingworth Kerosene Emulsion which is made from Whale Oil Soap and Water-white Oil.

Price: 1 pt., .30; postpaid, .40; 1 qt., .50; postpaid, .60.

DR. HESS DIP AND DISINFECTANT

Means Better Health Conditions FOR YOUR FARM STOCK

It kills body parasites. It destroys disease germs. It keeps down foul odors. It makes healthful living quarters. It keeps the skin clean and healthy. Stock health is the basis of stock thrift.

For Household Use

For the Sick-room. Make a solution of Dr. Hess Dip and Disinfectant, 1 tablespoonful to a quart of soft, lukewarm water. Place in an open vessel in the sickroom and renew every other day.

Price: 1 qt., .65, postpaid, .75; 2 qts., $1.00, postpaid, $1.15. 1 gallon, $1.75.

COOPER'S SHEEP DIPPING POWDER

The Original Powder Dip

One package makes twenty-five gallons of dip.

Price, .65; postpaid, .77

CROW CORN OIL

Protects newly planted corn from crows. Mix one part Anti-Crow Corn Oil with two parts hot water.

Price, .35; postpaid, .45

All Prices Subject to Change Without Notice
Creonoid
Barrett's Creonoid is an up-to-date preparation from coal tar and it is invaluable service to the poultrymen, stock raisers and farmers. It eliminates flies and mosquitoes, and insures sanitary conditions in stables, stock beds, around barnyards, etc.
Price, gallon cans, $1.25

Dr. Hess Fly Chaser
For spraying Dairy Cows, Horses and all farm stock.
Drives away Flies and Mosquitoes.
Price, 1 gallon, $1.50

Will Kill Flies
Kills flies, vermin and lice. Increases the yield of milk. Insures more eggs and better poultry. Kills lice on cattle and sheep ticks. Heals scab and hoof rot. It is an excellent disinfectant. Every gallon guaranteed. One gallon cans, price per gallon, $1.50

Crow Repellent
Stanley's Prevents crows, other birds, and animal pests from pulling corn. Protects corn from rot caused by moisture. Does not clog planter.
Price: Small can, enough for 1 bushel corn, $1.00, postpaid, $1.10.

Gypsy Moth Creosote
This is a special Creosote preparation for painting the egg clusters of the Gypsy Moth. The eggs are laid in the fall in clusters of two hundred to six hundred and should be destroyed between September and April.
Prices: 1 pt., .50, postpaid, .60; 1 gal., $1.25.

Insect Powder and Bellows Combined
Red Wing is the best Insect Powder that can be procured and once you try it you will use no other. For the destruction of Roaches, Bed-Bugs, Fleas, Moths, Ants, Flies, etc.
Prices: Small, .10, Parcel Post, .05. Large, .25, Parcel Post, .06.

FLIT
A scientific household insecticide.
FLIT kills flies, mosquitoes, moths, ants, bed-bugs, roaches, many other household insects, their eggs and larvae. FLIT is a 100% effective insecticide, containing no inactive ingredients. In exhaustive tests FLIT spray did not stain the most delicate fabrics.
Prices: 1 Half pint can, .50; postpaid, .60; 1 pint can, .75, postpaid, .87; 1 qt. can, $1.25, postpaid, $1.40; gallon can, $4.00. FLIT hand sprayer, .35, postpaid, .45.

VOLCK
Volck is one of the most powerful insecticides known. It is effective on practically all insects on ornamental and flowering plants. Wonderful results have been obtained against red spiders, cyclamen mite, aphids (green fly), scale, mealy bugs, thrips, and caterpillars. Many pests that could not be controlled before are now killed with Volck. Even mildews and rusts are prevented and stopped by Volck. Not only does Volck give effective control of pests, but it also prevents reinestation for a considerable period. Volck is odorless, colorless and non-poisonous. There is no unsightly residue. Plants are deep glistening green after using Volck.
Prices: ½ pt. cans, .50, postpaid, .60; 1 pt. cans, .75, postpaid, .87; 1 qt. cans, $1.00, postpaid, $1.15; 1 gal. cans, $3.00, postpaid, $3.20.

Evergreen
To kill Cutworms, use one part of Evergreen to 100 parts of water. Spray around plants, wetting ground thoroughly. Cutworms coming in contact with the solution will come to the surface and die. Keep ground around plants moist. Do not use soap.
Prices: 1 ounce bottle, .35, postpaid, .45; 6 ounce bottle, $1.00, postpaid, $1.10; 16 ounce bottle, $2.00, postpaid, $2.15.

All Prices Subject to Change Without Notice
BUG DEATH

Bug Death is a fine, tenacious powder, scientifically compounded and finely ground. It may be applied in water or DRY, just as it comes in package. We recommend DRY application; no drawing water, no mixing solutions. The best time for dusting is early morning when plants are wet with dew, which makes the powder "stick like all possessed."

Prices: 1 lb., Sifter Top Carton, .20; postpaid, .30; 12½ lb. box, $1.60, postpaid, $1.85; 100 lb. Bag, $10.00.

Bug Death Alpha

Bug Death Alpha is a Non-Arsenical Insecticide and Fungicide, designed for sucking insects, and for preventing fungous diseases on such crops, fruit trees and grapevines.

Fly-Tox

Clean and Fragrant

A Modern Insecticide for the Modern Home

Flies are a daily and deadly menace to the health and comfort of the people in your home. Flies carry germs and transmit disease. Kill the flies and stamp out infection. Spray Fly-Tox upward, saturating the atmosphere of the room, and all flies which come in contact with the clean, fragrant mist will die within a short time. Fly-Tox will not stall curtains or wall coverings.

The mosquito, like the fly, spreads disease and causes distressing annoyance by its mere presence. Kill the germ-carrying, biting mosquitoes with Fly-Tox.

Fly-Tox is effective in killing Roaches, Ants, and Bed Bugs.

Fly-Tox not only kills the moth millers, but also kills the moth larvae which does the actual damage. Always keep Fly-Tox on hand.

Prices: Half-pint bottle, .50, postpaid, .60; Pint bottle, .75, postpaid, .87; Quart bottle, $1.25, postpaid, $1.40; Gallon bottle, $4.00.

DICKY BUG DEATH DUSTER

For use in applying BUG DEATH, DRY, to small flower or vegetable gardens. It is a mighty handy thing to have around the house.

Price, .50; postpaid, .60

The Acre-an-Hour Sifter

Is ideal for applying BUG DEATH DRY. It is the very latest, a remarkably effective and distinctly economical method. Easy to operate and gives quick covering to all plants and vines requiring a top application. The price for this especially useful farm utensil is .75; postpaid, .85.

Experience has proven that the liberal use of BUG DEATH three or four times in a season is most economical, as it saves going over many, many times, as is the case with arsenical poisons. Try it this season and learn the exceptional benefits that will accrue.

BETTER MILK

BETTER DAIRY and FOOD PRODUCTS

by using

B - K

STERILIZER - CLEANSER - DEODORANT

POWERFUL SAFE CLEAN NON-POISONOUS COLORLESS

Note These Remarkable Qualities of B-K

Powerful. By U. S. Hyg. Lab. Method of Test B-K has coefficient 10— i. e. —10 times greater germ killing strength than undiluted carbolic acid.

Safe. B-K contains no poison, acid, oil, or anything harmful to food products. Sterilizes utensils—is not a preservative.

Cleanser and solvent of casein and bacteria.

Deodorant. It destroys all odors and their cause—leaves no odor of itself—helps to keep the dairy and the products clean and sweet.

Cheap to Use. B-K is so powerful that very little makes many gallons of sterilizing solution.

Put up in single gallon and single 5-gallon packages each separately boxed.

RAT CORN

KILLS Rats and Mice

Without Odor

It mummifies them. No matter where they die they simply DRY UP. Positively do not smell.

Rat Corn is a new and scientific discovery, and without a doubt the greatest rat destroyer in the world; the only one that kills rats without any bad, dangerous or disagreeable effects. A trial will convince you.

Prices: Small, .30. Medium, .50. Large, $1.00. Postpaid.
STIM-U-PLANT
An All-the-Year Fertilizer for Garden and House Plants

Growers of fine flowers, shrubs and vegetables for the best markets and for exhibition, fertilize and stimulate them frequently, a little at a time. An excellent fertilizer for this purpose is Stim-U-plant, an odorless, highly concentrated plant-food, in tablet form, with guaranteed chemical analysis of 11 per cent. nitrogen, 12 per cent. phosphoric acid, 15 per cent. potash. The proportions are accurate.

Make Your Garden a Wonder Garden
These tablets increase production, heighten color and improve quality. Many professional and amateur growers use them extensively all the year round—from early spring until late fall outdoors, during the winter for pot plants, hot-house benches, etc.

Stim-U-plant Tablets
Can be used in tablet form, or dissolved in water at the rate of one tablet to the quart. Complete directions with every package.

Order Stim-U-plant tablets with your seed and plant order. Price, 10 tablets for 15 cts., postpaid, .20; 30 for 25 cts., postpaid, .30; 100 for 75 cts., postpaid, .80; 1,000 for $3.50, postpaid, .75.

Sulphur Candles
The Crater Sulphur Candle Fumigator. 1/2 lb. size, .15, postpaid, .35; 1 dozen, $1.25, postpaid, $1.50.

Tree Tanglefoot
For protecting trees against climbing insect pests in a simple, economical and effective way, use Tree Tanglefoot—a sticky substance applied directly to the bark of trees. One application remains sticky on the trees three months, fully exposed to the weather. Easily applied with a small wooden paddle. One pound will make a band 7 to 8 feet long.

Price: 5-lb. can, $2.50, postpaid, $2.70.
HASKELL IMPLEMENT AND SEED CO.
LEWISTON, MAINE

SEED DISINFECTANTS

Control Seed-borne Diseases of Farm Crops
Stimulate Germination - Improve Stands
Generally Produce Increased Yields of Higher Quality

CERESAN
for seed treatment of small grains

Ceresan has proven effective in controlling such seed-borne diseases as bunt or stinking smut of wheat; stripe disease of barley; loose and covered smuts of barley and oats and covered kernel smut of sorghum. It is the only dust treatment which has successfully controlled these destructive grain diseases. Ceresan does not injure the seed nor the grain drill. Only 2 oz. of Ceresan required per bushel of wheat, rye or sorghum and 3 oz. for barley and oats. Easy to apply, economical to use. *

PRICES
8 oz. $ .50
1 lb. 1.75
5 lbs. 3.00
25 lbs. 12.50
100 lbs. 49.00
300 lbs. 144.00

SEMESAN BEL
for seed white and sweet potatoes

Simply mix, dip, drain, dry and your seed potatoes are ready for planting. Semesan Bel may be used on either whole or cut seed pieces. Semesan Bel effectively controls such seed-borne disease organisms as scab, rhizoctonia and black-leg. By controlling these diseases, germination is generally increased, stand improved and the resultant crop bigger and of better quality. One pound treats 16 to 20 bushels of seed. Du Bay Semesan succeeds the products sold as Du Pont Semesan Bel and Bayer Dipdust.

PRICES
4 oz. $ .50
1 lb. 1.75
5 lbs. 8.00
25 lbs. 31.25
100 lbs. 120.00
300 lbs. 345.00

SEMESAN JR.
for seed field and sweet corn

Semesan Jr. is especially effective in controlling seed-borne infections of dipodia, Gibberella and Basidiorium, without harming the seed embryo in the least. Its use protects the seed from rotting in the ground and makes possible earlier planting which generally results in increased yields. Improved germination, better stands, control of certain diseases, increased yields are the benefits which thousands of farmers are reaping, at a cost of less than 3c. an acre. Succeeds the products sold as Du Pont Semesan Jr. and Bayer Dust.

PRICES
4 oz. $ .50
1 lb. 1.75
5 lbs. 8.00
25 lbs. 31.25
100 lbs. 120.00
300 lbs. 345.00

SEMESAN
for flower and vegetable seeds

Semesan may be applied in dust or liquid form to the seed before planting. It is harmless to the seed but deadly to disease organisms that may be on the seed. Semesan is such a powerful and effective disinfectant that seed treatment with it is ridiculously low in cost, ranging from ¼c. to 1c. per pound of seed. One ounce treats 15 lbs. of seed. Effective in controlling damping off and such devastating gladiolus diseases as hard rot and scab. Du Bay Semesan succeeds the products sold as Du Pont Semesan and Bayer Uspulun.

PRICES
4 oz. $ .50
1 lb. 1.75
5 lbs. 8.00
25 lbs. 31.25
100 lbs. 120.00
300 lbs. 345.00

Du Bay Seed Disinfectants, like many agricultural chemicals, are poisonous in nature and owing to present Postal Regulations cannot be sent through the mails but must be sent by express or freight.

Van Brunt Lime and Fertilizer Sower with Oscillating Agitators

“PREMIER” BRAND

Pulverized Poultry Manure
Pulverized Sheep Manure

A complete natural fertilizer, supplying all the necessary plant food elements—Nitrogen, Phosphoric Acid and Potash—in combination with organic matter or humus, and it is this natural combination that produces the peculiar action and effect in the soil which can only be had from animal manures. It can be used without fear of weeds and foreign grasses that always follow the application of ordinary stable manures.

For the lawn there is nothing better, and its convenience makes it the logical fertilizer. There is no straw or other refuse in it as is always the case with crude manures. Barnyard manure should never be applied to a lawn, as it usually contains seeds of noxious weeds, which germinate and grow. A few weeks will show surprising results:

Its use on the vegetable garden will double the yield and insure better vegetables, also hurry the growth for earlier table use. Probably the best way to use it is to scatter it broadcast, harrowing or raking it lightly but reserving a little to use in the hills or drills. Then the young plants will have some nourishment close at hand to give them a good start.

Sizes, 5 lb., 25 lb., 50 lb. and 100 lb. bags. Write for prices.

Better Lawns—Better Vegetables
Better Flowers

You can have better lawns, flowers, and vegetables, if you use hardy, disease-free seed and the right plant food.

Plants, like human beings, must receive the right nourishment. Vigoro provides an economical, practical, and effective way to secure finest results. Economical because the cost is only 10c to 20c for every 100 square feet. Practical because it is clean, odorless, easy to apply—can be sown by hand like grass seed or applied with an ordinary kitchen colander. Effective because it contains all of the elements of plantfood required to produce early, vigorous growth and bring fruit, flowers, and foliage to full development. Complete directions in every bag.

Sizes, 5 lb., 25 lb., 50 lb. and 100 lb. bags. Write for prices.

Queen Incubators

A Queen costs but little more, and the extra chicks that live and grow soon pay the difference.

Remember, it is not how many chicks you HATCH that counts, but how many you RAISE. Chicks that hatch out weak and wobbly, and live but a few days, mean nothing to you but trouble and loss. They make one sick of the poultry business.

Most of the chicks you lose in the first few weeks die because they did not have, when hatched, enough strength or vitality for a good start.

Proper Insulation

The Queen is doubly insulated. First we use double walls of California Redwood, forming a dead air space. Second, corrugated strawboard is used between the wooden walls.

Queen Hot Water Heating

The Queen System of hot water heating prevents the drying out tendencies found in hot air incubators and provides a soft, uniform heat over every part of the egg chamber—a heat that is most natural for the hatching eggs. The circulation of water through the radiator prevents any moisture being added or taken away from the eggs. When it becomes necessary to remove the lamp, the hot water circulating through the radiator maintains an even heat within the egg chamber without the slightest variation.

Built of California Redwood

The Queen is the only Incubator that carries out the double redwood wall construction all around, and provides a double wall front, in the way of two separate doors. The outer door is a solid panel of redwood that is hinged entirely independent of the inner door.

The inner door is also of redwood construction, containing a panel of glass the full length and height of the egg chamber.

NEWTOWN Colony Brooder
Coal-burning, Self-regulating

The Newtown Coal-burning Colony Brooder needs no introduction to poultrymen. It was the first coal-burning, self-feeding, self-regulating Colony Brooder put upon the market—has been longer in use than another of its type—and is giving efficient service in every State of the Union and nine foreign countries. It represents the modern up-to-date brooder in the highest form of development. The Newtown way is the proven road to better profits.

The Little Putnam Stove is eight inches in diameter and four inches high. It is made of galvanized iron and brass. For use under drinking vessels in the poultry house to keep water from freezing during the winter months. Price, $1.05; postpaid, $2.07

Cyphers Incubators

These are machines that for twenty years and more have been recognized as the "Standard hatchers of the world." Every Standard Cyphers Incubator is guaranteed by the manufacturers to do first-class work in the hands of every purchaser who will give it a fair trial. Are built in four popular sizes,

DAIRY SUPPLIES

Aseptic Milking Tube

2⅛ in., plain. Exact size, .25; postpaid, .30

The Aseptic Milking Tube is recommended because it is so well finished and easily sterilized. It is manufactured regularly in 1⅛, 2⅛, 2¾, 3¼ inch lengths; plain or self-retaining, as desired.

The "Boston" Aseptic Teat Dilator (Dr. Murphy's Modification)

No More Hard Milkers

"Spider" in the teat is easily cured, and sphincter paralysis entirely disappears after a few days' use. Recommended by veterinarians and dairymen.

Price, 25c each, postpaid, .30

Milk Fever Outfit

A cheap, portable, non-destructible apparatus for use in cases of milk fever. More economic than oxygen apparatus. It can be carried in the coat pocket. No wide-awake veterinarian case is complete without one of these instruments, and every dairymen should be provided with one for an emergency.

Price, each, $3.75; postpaid, $3.90

Test Bottle Brush — For Cleaning Babcock Bottles

"Boston" Aseptic Stricture Cutter

An Essential for Every Dairymen

The Boston is modeled on improved lines, and embodies the highest class of workmanship and utility, yet is so simple that professional assistance, while always desirable, is not necessary.

Price, each, $3.00; postpaid, $3.15
The Sensible Bottle Filler

This is a small tank, heavily tinned and holding about sixty quarts. It has two straight bore faucets in the bottom near the edge. They are inexpensive and very handy for the small milk dealers who do not feel like paying a large sum for one of the larger machines. Price, each $8.00.

“Dandy-Lion” Weed Killer

Dandelion, Pigweed, Burdocks and other common weeds quickly and easily destroyed without cutting or digging, by use of the new “Dandy-Lion” Weed Exterminator. Cutting or pulling off the tops only retards the growth, the weeds soon re-appear, more vigorous than before. One operation with the “Dandy-Lion” kills root and all.

How It Works

All working parts are made easily accessible. The base with all working parts is quickly unscrewed and opened up for cleaning or adjustment. The plunger is pushed down into the crown of the weed and the hole is enlarged by moving the handle with a circular motion. Then by pressing down the handle, the valve opens, the desired amount of weed killing solution is deposited in the centre of the root to be killed and the work is done. Price, $1.00.

Black, Cattle. 1.30

The Handy Andy is a Jim Dandy. It is the last word in low-priced grinder construction. Nothing cheap about it but the price. It is smooth running, extremely powerful for its size, and strongly built. Has 4x1 in. Corundum wheel.

Price, $2.25; postpaid, $2.40

No. 7 Cheney Mower Knife and Tool Grinder.

Price, $9.00

The Dayton Type “B” Sprinkler

Nozzle easily adjusted from wide-sweeping spray to heavy stream. Will sprinkle circle 3 to 56 feet in diameter. Price, $3.75; Postpaid, $3.90.

The Fountain Lawn Sprinkler

The sprinkler with the “mist-like” spray.

Price, .75; Postpaid, .85

Garden Hose

Hisco first quality garden hose, moulded with corrugated finish. Guaranteed. 5/8 in. 25 and 50 ft. lengths. Price per foot .15

Palisade, a guaranteed hose at a little less price than our Hisco. 5/8 in. 25 and 50 ft. lengths.

Price per foot, .12

Diamond Spray Nozzle.

This is unquestionably the best combination spray nozzle on the market today. It is made of but three parts, all of which are made to gauges on automatic machines, thus insuring perfect uniformity and adjustment.

Price, $0.50; Postpaid, $0.60

Daisy Nozzle

This is our original Daisy Nozzle. It is made with screw tip and shut-off cock; it is of good brass and finely finished. This Nozzle gives a smooth, free water way for the solid stream, and throws a large amount of water when spraying.

Price, $1.00; Postpaid, $1.10

Dayton Sprinkler Type “C”

Guaranteed to cover larger area than any other sprinkler made with arms, because of main stream flow from two center nozzles.

This flow can be regulated to throw 4 to 6 gallons of water per minute by simply taking off nozzle caps.

Price $2.50; Postpaid, $2.65

 Victor Game Traps

A reliable trap is as important to the trapper as a good gun is to the hunter. For the loss of one pelt often equals the cost of a whole season's traps.

In the minds of the trappers who have used various brands of traps, the Victor is conceded as holding first honors, for durability and general efficiency, all things being taken into consideration.

Goodwin Grass Shears

Lawn trimming, once a dreaded chore, has been robbed of all its unpleasantness. For GOODWIN Grass Shears are so comfortable, so easy to operate that the job is over in a jiffy—and it leaves no fatigue.

The natural up-and-down movement of the GOODWIN eliminates wrist-tire and finger-ache; their advanced design keeps blades flat on the ground with handles up and out of the grass. A tension adjustment is provided to adapt them to all cutting requirement and prevent binding or spreading of the blades. Bright orange handles make them easy to find in the grass.

Shaped to get into out-of-the-way corners without discomfort or inconvenience, GOODWIN Grass Shears really do a better job of trimming your lawn.

No. 16 Goodwin Shears, Ball Bearing. Price, $1.75; Postpaid, $1.85.

No. 20 Goodwin Junior Shears. Price, $1.25; Postpaid, $1.35.

LAWN MOWERS

Superb is a strictly high-grade ball-bearing Lawn Mower. It is made of first-class material throughout and the workmanship and finish are unsurpassed. It has large driving wheels and fine cut gears, thus insuring ease and quietness of running.

This Mower is furnished with patent double-edged ottom knife which is shaped like a piece of channel iron with two up-turned highly tempered edges.

Prices: 20 in., $30.00; 22 in., $32.25

The Lakewood

This Mower we guarantee to be the best ball-bearing Lawn Mower, for the price, on the market. It has high wheels (9 inches), flat, steel sliding pawls in the ratchets, and large diameter revolving cutter (6 inches), furnished with four blades.

This Lawn Mower is equipped with our patent adjustable ball bearings, the adjustment of which is accomplished by means of a single screw.

Prices: 16 in., $13.25; 18 in., $14.50

The Quality

This is a good Mower at a medium price for all ordinary work. The drive wheels are nine inches in diameter. The revolving cutter is 6 inches in diameter and has 3 crucible steel blades highly tempered and rounded true their entire length. It is carried on our patented adjustable ball-bearings.

Prices: 14 in., $9.25; 16 in., $9.65; 18 in., $10.00

Townsend's Victory

We cannot offer a better Mower at any price. It has ball-bearings of the very highest grade exact to 1/1000 of an inch, which greatly reduces friction. Double Steel Ratchet, very swift and smooth in action, as well as exceedingly hard for durability. Triple gear. Entirely enclosed, allowing no dirt or cut grass to find its way into the pinions or cogs.

Prices: 16 in., $22.25; 18 in., $23.75; 20 in., $25.75

Townsend's Flyer

A splendid High-Grade Mower, at a little lower price than the "Victory," Ball-bearings entirely enclosed. Adjustments very simple. Knives very hard and of the best steel.

Prices: 14 in., $13.25; 16 in., $14.50; 18 in., $15.75
Water Ballast Lawn Roller

Price ......................................................... $21.00

1,000 Lbs. Capacity.  Platform, 17x28.  
Price ......................................................... $23.50

Carter Portable Wood Working Machine

A Practical, Efficient and Accurate Complete Machine.
A combination machine for sawing, edging, grinding or drilling. Designed to give you a sturdy yet portable wood-working machine. A machine built well and fitted with the best quality of equipment on the market.
The Frame is of heavy 1 1/2 in. angle steel, thus combining maximum strength with minimum weight. Construction could not be stronger yet these machines are light and easily portable.
The Table is cast iron, one piece, ribbed construction 12x21 inches, ground to a smooth and accurate surface. Hinged at back and raised or lowered by thumb screw in front. Height of table top, 32 inches. Machine complete with motor, ready to operate, weighs only 95 lbs.
Write for special circular and price.
O-CEDAR POLISH MOPS

A Better and Easier Way to Clean

Cleans and polishes at the same time, putting a high, lasting lustre on all varnished surfaces. There is nothing to equal O-Cedar Polish Mop for polishing floors, linoleum, etc. Gets down into the corners, gets the dust under beds, heavy furniture, radiators, etc. The mop is padded and cannot scratch or mar the furniture.

Prices:

- No. 3 Large Triangle O-Cedar Polish Mop $1.50
- No. 4 Small Triangle O-Cedar Polish Mop $1.00
- No. 9 Triangle O-Cedar Dust Mop $1.00
- No. 63 Slip On O-Cedar Dust Mop $1.00
- No. 15 Special O-Cedar Polish Mop $.75
- No. 17 Triangle O-Cedar Polish Mop $.50

O-Cedar Polish

A Wonderful Varnish Food

For cleaning and polishing floors, furniture, automobiles, etc. O-Cedar is by far the most economical furniture polish, as it is used with water. Puts on a high, hard, lasting lustre, and does not leave a bluish cast and gummy surface. It contains no grease, mineral by-products or benzenes.

Every ingredient of O-Cedar Polish is a pure vegetable substance. Positively will not ignite. It is easy to use. Very little rubbing is required. O-Cedar Polish is well and favorably known and is widely advertised in connection with the O-Cedar Polish Mop.

Price: 4 oz. Bot $0.30  
Price: 1 qt. Cans $1.25  
Price: 12 oz. Bot $.60

Martin's 100% Pure Floor Varnish

Composed of the best absolutely pure Oils, Varnish Gums and Turpentine—no adulterants or cheapeners of any sort.

Combines extreme durability—toughness—elasticity and absolute resistance to hot or cold water. Is Mar and Grease Proof. Remarkably free and easy working. Covers much more surface than adulterated Varnishes. Dries to walk on over night. Can be rubbed and polished to a fine finish in three days. The first varnish ever labeled 100% pure.

Gals. 1/2 Gals. 1/4 Gals. 1/8 Gals. 1/16 Gals.
$5.50 $2.95 $1.60 $ .90 $ .50

THE IDEAL FLOOR VARNISH

Martin's 100% Pure Interior Finish

A fit companion to Martin's 100% Pure Floor Varnish—produces a rich and permanent gloss finish—is not affected by moistures, works very easily and dries hard in 36 hours. It may be rubbed to a beautiful finish after three to four days.

We recommend its use for finishing the finest interior Woodwork.

Gals. 1/2 Gals. 1/4 Gals. 1/8 Gals. 1/16 Gals.
$5.50 $2.95 $1.60 $ .90 $ .50

THE INTERIOR FINISH DE LUXE

Martin's Amber-Lyte

Martin's Amber-Lyte is the only penetrating floor finish on the market today. Unlike a varnish, it not only forms a film over the surface of the wood, but penetrates into it to such an extent that even when the surface of the wood is worn away, the Amber-Lyte finish and protection still remain. Penetrates farther into maple wood than linseed oil will penetrate into pine. Dries over night with rich satin finish. Practical finish for floors of maple in schools, hospitals, kitchens, as well as in homes.

It is used extensively by Master Painters as a filler in place of shellac.

Gals. 1/2 Gals. 1/4 Gals. 1/8 Gals. 1/16 Gals.
$4.25 $2.30 $1.35 $ .75 $ .45

THE PENETRATING FLOOR FINISH

Martin's 100% Pure Velour Finish

This unusual Varnish will give a perfect effect of a rubbed finish, either Flat or Semi-Gloss, and it saves the expense of rubbing. Can be successfully applied over either old or new Varnished surfaces. Produces a soft, satiny depth which is very artistic and pleasing to the eye. Works very freely and dries in 18 to 20 hours.

THE SATISFACTORY FLOOR FINISH
Our Colonial Paint sales have more than doubled in the last twenty-five months. Are you handling this line? If not, you are missing a great opportunity to increase your business.

Colonial Paint is used on every job where quality counts.

Pure lead, pure oil, pure zinc, pure dryer—that is Colonial Outside White. Send for a case of this wonderful product for your next customer and he will be advertising your wares, just the same as Mr. Goodrich, whose unsolicited testimonial is given below:

Lewiston, Maine,
May 3rd, 1929.

Haskell Implement & Seed Company,
Lewiston, Maine.

Gentlemen:

Feeling it a duty, I stop for a few moments to inform you of the results obtained after using Colonial Paint on my buildings in Winthrop, Me.

In the first place the buildings were washed with soap and water (as they were well covered with paint), for they were very dirty due to road building, then one coat of Colonial Outside White was used and Natural Bronzite for the blinds, and I take pleasure in stating that I believe it one of the finest paint jobs in Maine. The painter, Mr. William Parker, told me this spring, that since he did the work last August, that out of state people had called at his place and asked how the paint was put on, also the brand, where it might be obtained, stating that it did not seem possible for paint on buildings to be so white.

The caretakers informed me tourists have stopped en route, to look the buildings over and some calling at the door, asking the brand of paint. I was down there this week and found the paint surface as glossy and white as it was when first done.

This letter was not solicited and may be used for any purpose you see fit to do with it, or call on me at any time.

Very truly yours,

(Signed) E. P. Goodrich, M.D.,
District Health Officer,
136 Webster St.,
Lewiston, Maine.
This is an enamel floor paint that flows on without showing a brush mark, leaving a mirror-like surface. One coat is sufficient on old work. Dries over night. Can be applied by anyone. Made for both exterior and interior use. Send for a color card of ten attractive shades.

VELVETA

Velveta is a splendid interior flat paint made for use on walls and ceilings either wood or plaster. It has great covering capacity, flows easily under the brush and will not show laps. Velveta gives a soft dull velvet finish. Is made in fourteen attractive colors as well as white.

COLONIAL A No. 1 VARNISHES

Colonial A No. 1 Varnishes are standard in quality, because they are made of the finest gums obtainable.

They are not affected by boiling hot water or ammonia.
Put up in all sizes and for all purposes.
Bronzite—"The permanent green paint"—insures the green color against fading on every job where it is used. Made in six beautiful shades and in all sizes.

No matter how good the rest of your home looks, if the green fades the whole job looks bad. Use Bronzite Green for perfect results.

Adhesium is a wall paper size so sticky that lincrusta can be hung on any surface without fear of it coming off.

Adhesium will detect the hot spots, showing where to shellac to prevent free lime from burning through the wall paper.

Adhesium may be used as a primer on new wood, as a "between coater," thus saving stock and labor.

Adhesium is indispensable to the careful decorator.

Adhesium is cheaper than glue and 100 times more effective.
Thousands of people have changed their furniture, autos, and boats from dull unattractive objects into shining examples of what just every day folks are able to make with a brush and a can of this wonderful Lustrolac Enamel—and it dries in four hours.

Dealers are turning their stocks on Lustrolac five to ten times a year because it is the best enamel you can possibly use on any surface either inside or outside.

Send for a free sample, enough to enamel the fenders of your car.

Lustrolac is also made in five shades of varnish stain suitable for floors and furniture—Light Oak, Dark Oak, Light Mahogany, Dark Mahogany, and Walnut.

Lustrolac Varnish Stain is made from the same varnish that makes Lustrolac Enamel so wonderful.

**Important Announcement**

$50.00 WILL BE GIVEN IN PRIZES

for the best slogans submitted for advertising Lustrolac.

Over $50.00 in prizes will be given to the first, second, third and fourth best contestants sending us the best slogans for use in promoting the sale of Lustrolac Enamel.

The only condition is that you send with your slogan a receipted bill for a can of Lustrolac Enamel from your local dealer.

- **Fourth Prize:** Two quarts Colonial Lustrolac Enamel, any shade.....Worth 3.50

$56.50

Send your slogan to Haskell Implement & Seed Co., Lewiston, Me.

"CONTEST CLOSES JULY 31, 1930"
STORMTIGHT is an adhesive compound, ten times thicker than paint. It does not dry out nor become hard and brittle. Under the slow curing process that it undergoes, the top surface becomes firm but the body of the material underneath remains pliable and elastic, so that it readily conforms to the expansion and contraction of the roof surfaces. It retains its rubber-like consistency indefinitely under all weather conditions.

Stormtight is the result of years of scientific research. Hundreds of exposure tests were made on every kind of roofing material, under varied weather conditions. These tests were closely watched. One by one the harmful ingredients were rejected, the wrong combinations eliminated, until the present formula was arrived at, which gives you a roofing product with the following ideal characteristics:

A one-piece covering without joints or nail holes.

Impervious to rain, snow, wind and sun.

Unaffected by gaseous vapors, acids or alkalies.

Will not harden, crack or peel.

Highly fire resistant.

Low in cost.

Stormtight can be applied in any weather, by anybody. It sticks to any kind of roofing material; no matter whether the roof is wet or dry, hot or cold, you can stop a leak a few minutes after you discover it. Stormtight is a scientific blend of oils, special waterproofers, reinforcing pigments and asphalt, based on years of investigation and practical tests.

ASBESTOLINE
PROTECTS AND PRESERVES ROOFS

The very best waterproof and weatherproof Asph of high elasticity thoroughly fabricated with A BESTOS fibre constitute its ingredients and perfect a product that meets every climatic requirement—change—a substance that neither expanding heat contracting cold affect.

The application of ASBESTOLINE requires experienced help or any elaborate outlay for too. A common floor hand brush is all that is needed a one coat of ASBESTOLINE will save that "wot out, no-more-good roof," and keep it as tight as t proverbial drum for many years.

Aside from its long, life-giving properties, A BESTOS being incorporated in ASBESTOLINE insures that ASBESTOLINE will not crack or peel, and it impervious to acids, gases, or alkalis. Once it set ASBESTOLINE is also fire resisting.

ASBESTOLINE on account of its heavy body set up small holes, seams and cracks and creates elastic roof without joints, seams or laps.

Once ASBESTOLINE is applied it will do away with the maintenance and painting that is required with most other roofings. This one feature alone will more than pay for the cost of ASBESTOLINE any roof.

Use ASBESTOLINE for permanency on flat sloping Roofs of Iron, Steel, Felt, Composition, Gravel or on any surface requiring waterproofing protection against the weather, acids, gases or alkalis.

We specially recommend ASBESTOLINE for water proofing concrete and foundations and preservation of timber. The application is simple and the cost is very small. Every property owner, industrial plant as well as the farmer, will save money by the various uses of ASBESTOLINE.

When you want Real Roof Protection at LOW cost—USE ASBESTOLINE

Write for Folder and Prices

INTERNATIONAL ELASTIC CARBON PAINT

A practical, scientific blending and grinding oils and pigments, making a paint of enduring elasticity, for shingle, felt, canvas, paper, asphalt, tin at iron roofs, bridges, machinery, tanks, iron or steel buildings, smoke stacks, boilers, burners, brick, tile concrete, farming tools, wagons, also the hulls at bottoms of vessels and boats.
A “Good Roof” means a “Trouble-free” Roof

Here’s a roofing you can put on a building—and then forget.

Rotproof and rustproof—Everlastic Mineral-Surfaced Roofing doesn’t call on you for care or maintenance,—no painting, no staining, no upkeep of any kind.

And it’s fire-safe. If sparks or embers light on your roof, they sizzle out harmlessly. Moreover, Everlastic Mineral-Surfaced Roofing adds good looks to a building. It presents a surface of fadeless mineral in attractive colors—soft Red, moss Green, or shadowy Blue-Black."

Note this special feature of real value—the 2 inch “selvage.” This furnishes an accurate guide in laying. It’s a simple matter to distribute the cement evenly on this selvage—no cement streaks smearing up the roofing. Moreover, laps stay tight.

In brief, no better value on the market than this fine, time-proved roll roofing.

Smooth-Surfaced Roofings: Where this type of roofing is desired we recommend the Barrett Everlasting Brand, a roofing of heavy felt base thoroughly saturated with bitumen, that will give long years of satisfactory service.

Not Just a Roof - A Lasting Protection

Any roofing will protect your house—for a while. What you want lasting protection. Protection against rains—against heat in summer and cold in winter—against fire.

All this is assured in Barrett Everlastic Shingles. In addition you get color—beautiful reds, blues, shadowy blue-blacks as well as variegated tones.

While Barrett has many styles of shingles, none is more popular than the sturdy Everlastic Multi-Shingles, colorful and sturdy, are frequently used for re-roofing over old wooden shingles.

A Barrett shingle roof makes any use easier to sell. Color in a roof helps the sale value. Everlastic Multi-Shingles, colorful and sturdy, are frequently used for re-roofing over old wooden shingles.

We endorse Barrett Roofings

STRAIGHT-AWAY GARAGE DOOR HANGER

A Practical Outfit

"Straight-Away" is easily and quickly installed. It is made to fit standard doors. In the carton all parts and screws are separately packed and marked where they are to go. No possibility of making a mistake. You yourself, can install it in an incredibly short time.

Its straight track does away with extra labor and extra cost where a supporting arm is required. And it permits saving of space, because the doors are Folding-Sliding. The Offset Swivel—an exclusive Porter feature—assures a perfect fit of doors against jamb and weatherstrip. No possible chance for a "Straight-Away" outfit to sag, spring or bind. Slotted holes in the hanger plate make it easily and quickly adjustable to uneveness in floor, etc.

What the Set Includes

The "Straight-Away" Garage Door set contains everything necessary for you to immediately install it. Note that no brace timbers are required, as the track is straight throughout its length.

The set is designed primarily for standard doors, 2 ft. 8 in. x 8 ft., these filling the regular width opening of eight feet.

Price, complete with all fittings as illustrated above, including 8 feet double V track...$7.50

Challenge Ball-Bearing Grindstone

A well and substantially built machine equipped with both hand crank and treadle. Frame is all steel—finished in Japan red paint. Runs true and easy, for axles are fitted with all-Bearings.

Furnished with carefully selected Berea grit—one from 2 to 2½ inches thick.

Challenge Ball-Bearing.
Large stone...$10.75

Challenge Ball-Bearing.
Medium stone...$9.50

No. 300 Cycle Grindstone

Angle steel frame, ball bearing.
Price with medium stone, $9.85
HAY CARRIERS

The Myers O. K. Hay Unloader

For Rope or Cable Draft

The Myers O. K. Unloader with extra long truck and seven-inch sheaves for cable draft rope is especially designed for heavy work. The long truck distributes the load on the track and adapts the car for using two forks or slings.

The bearings on all rope sheaves are 1 7-16th diameter, hard turned steel.

Price List, Represented by Fig. 1652

No. 209. Myers O. K. Unloader for Double Steel Track, 7-inch sheaves.
Net Price, $12.50

No. 200. Myers O. K. Unloader for Double Steel Track, rope draft, small sheaves, otherwise same as No. 209.

Myers Self-Oiling Bulldozer Power Pump

The Power End consists of a one-piece casting which forms the base of the pump and oil reservoir and encloses all working parts, protecting them from dirt or injury, and securing safety of operation. From the oil reservoir in the base, oil is carried by the main gear to the highest parts of the pump and by a system of channels distributed to all moving parts and returned again to the reservoir. This system of flood lubrication contributes quiet operation and long life, with a minimum of attention.

Washington White Spruce Wood Pumps

It is a well known fact that a good Wood Pump furnishes the easiest and best method ever invented for raising water from shallow wells. Easiest repaired, cheaper to maintain, by far, than are Iron Pumps.

Washington White Spruce from which our Wood Pumps are made is superior to any other wood, is practically without sap, and is entirely tasteless.

Garden Cultivators and Seeders

Seeder and Single or Double Wheel Cultivator

No. 201

The No. 201 Machine is a combination outfit which may be used as a hill or drill seeder, double or single wheel cultivator, plow or hoe, as conditions require. It has all the equipment to serve the gardener from the initial seeding, until final cultivation. It is readily converted from one use to another; the change from seeder to cultivator being accomplished by removing two red-headed bolts. One standard frame is used throughout.

As a seeder, this machine opens the furrow, drops the seed, closes the furrow, packs the earth, and marks the next row — all in one operation. The seed regulator is made entirely of brass, with openings die cut to insure absolute uniformity. This gives perfect control of the seed flow and insures a uniform drop. Sows all seeds from beans down to the finest garden variety, in continuous drills, or hills, 4, 6, 8, 10, 12 or 24 inches apart. Adjustments in furrow-opening shoe and furrow coverer permit planting at any depth up to 2 inches.

No. 201. Weight 60 lbs. Price $17.00

No. 205

The man who must do a great deal of seeding and do it repeatedly, requires a machine which is always set up and ready for use. He does not favor a combination machine such as our No. 201 described above.

To meet this demand we offer our No. 205 Hill and Drill Seeder. It will sow any kind of seed from beans down to the very finest of garden seed, either in drills, or in hills spaced from 4 to 24 inches apart. The brass seed regulator is absolutely accurate and control of the seed flow is 100% perfect.

No. 205. Hill and Drill Seeder only. Weight 50 lbs. Price $14.00

No. 212 Cultivator may be used as a double wheel hoe, plow, or cultivator a stride the row during early cultivation, and as a single wheel cultivator between the row later. The angle steel arch is high enough to permit straddling until the plants are well grown.

Tool equipment is made of high grade steel, with surfaces polished and lacquered so as to scour in any soil. Cutting edges are sharpened to reduce friction. Mold boards are curved to turn the earth cleanly. All shanks are malleable and unbreakable. Teeth are designed to thoroughly stir up the soil and give the plant roots plenty of air. Wheels are 16 inches high, with 1 1/4 inch tire. Handle is seasoned hardwood, with the easy plow-handle grip and adjustable to height. Reinforced with steel cross brace which will not break or pull out. Standard steel frame and arch are used, so that seeder parts may be added if desired, making the complete No. 201 outfit.

No. 212. Weight 35 lbs. Price $10.00

Garden Plow

The high wheel garden plow is a universal favorite with the truck farmer or gardener where the work is sufficient to justify separate machines for seeding and cultivating.

A 24 inch high wheel is used which makes traction very easy. Handles are of the right length and adjustable to height for the comfort of the operator. Frame work is of steel, giving great strength and rigidity without excessive weight. The Plow, double pointed shovel and sweep, are made of regular plow steel and are polished and lacquered. The cultivating attachment is made from malleable iron and is equipped with 5 removable steel teeth.

Standard Package — One in bundle. K.

No. 320. Garden Plow. Price $4.50

All Prices Subject to Change Without Notice
**Most Popular Seeder Made**

The MIDGET SEEDER will pay for itself in a short time, because it saves by sowing accurately. Sowing by hand wastes seed.

It is very easy to operate and drills almost any kind of garden seed from the smallest up to and including peas and beans.

The index is in plain view and easily adjusted. The shoe is adjustable for any depth desired, and the coverer wings free.

The Midget opens the furrow, sows the seed and covers up, all in one operation.

It is sold with handle complete, or may be easily attached to almost any wheel cultivator. Hopper holds one pint. Weight 5 pounds.

No. 1 H with handle. Price.................................$4.50

**Quick-Adjustable Cultivator**

The TRUE EMPIRE, No. 12, is recognized everywhere as the only real quick-adjustable cultivator on the market.

It has a New Mulcher- pulverizer, Weeding Hoe, a low and five Cultivator teeth, all permanently attached to a revolving steel shaft.

Any of these tools may be securely locked into working position by a few turns of the hand Wheel—a time and labor saver.

Machine has steel forged tools, well selected oak handles, with comfortable handle grips. It has 14-inch steel wheel and is finished in colors, then varnished. Weight 20 pounds.

No. 62, Price ..............................................$6.00

**Champion No. 50F**

Champion No. 50F has the popular braced steel Hook Frame and Oak plow-grip handles. It is handy and efficient, an extreme value among cultivators and cannot be matched at the price. The steel wheels have steel bushed hubs, the handles are adjustable not only for the height of the operator but also for the set of the working tools.

The Moldboard Plow with Landside is properly designed and oil tempered, and will hill, plow or furrow.

The Reversible Sweep with four Cultivating Teeth and the Reversible Calf and Bull Tongue work perfectly and handle without difficulty, and are so carefully made that the machine runs easily and in perfect balance.

50F. Weight 20 lbs. Price....................................$3.50

**Iron Age**

No. 19-C Iron Age Wheel Cultivator and Plow is a low-priced tool and will always be a convenience to have for many kinds of work.

It does the necessary plowing in many soils, opens furrows for seed or fertilizer and covers on the return trip. Shipping weight, 22 lbs. Price..................$5.00

**Thompson Combination Distributor**

For Fertilizers and Seeds

For side dressing and top dressing or sowing lawn seed mixtures. Distributes accurately as fast as a man will walk. Saves time, labor and fertilizer or seed. Quickly adjusted for different quantities.

Complete plant foods and other dry mixtures can be applied as side dressing on each side of two rows at one operation without touching plants, rows from 10 inches to 18 inches apart, or in the middle of three rows at one time by quickly adjusting the outlets.

With the spouts quickly removed, it will broadcast uniformly over a space 30 inches wide fertilizers or seeds, making it useful for lawn and garden. Not affected by wind. Very simple and substantial. The hopper beneath the handles balances nicely and may be removed for storage.

No. 108—Combination Distributor..........................$22.50

Shipping Weight, 50 lbs.
A Complete Line of Good Farm Implements

There is a John Deere implement for practically every farming operation. Each carries the John Deere trade-mark, the best-known badge of quality in the implement world.

**John Deere-Syracuse—1441 Series**

Walking plow. This series have steel wearing parts except the share, which is chilled.

No. 1442S cuts 5 to 7 in. deep and 10 to 13 in. wide. Weight, 150 lbs.

No. 1441S cuts 5 to 8 in. deep and 12 to 15 in. wide. Weight, 152 lbs.

For gritty or gravelly soils. Sloping landside prevents furrow wall from breaking or caving in. Moldboard has sufficient curve to pulverize in stubble land. Also works equally well in loam and turns sod perfectly. Rib in landside holds plow to its work. Steel beams—guaranteed not to bend or break. Shares and landside chilled extra deep by special Syracuse process. Full horn share—a new cutting edge on the shin is obtained with each new share. Cuts 3 to 5 in. deep, 6 to 8 in. wide. One horse size. Weight 82 lbs.

**Syracuse No. 31 Plow**

Cuts furrow 5 to 7½ inches deep, 10 to 13 inches wide. Weight 110 lbs.

This type of Side Hill Plow has always been very popular in New England, being light, but still having great strength, and good turning qualities. Easy shifting clevis and also automatic shifting Coulters except on small size. Furnished in three sizes:

- Diamond A2, Medium, 2 Horse, Weight 130 lbs.
- Diamond B2, Light, 2 Horse, Weight 126 lbs.
- Diamond C2, Light, 1 Horse, Weight 85 lbs.

**Syracuse No. 32 Plow**

Cuts furrow 5 to 7½ inches deep, 10 to 13 inches wide. Weight 110 lbs.

Especially adapted for tearing up cobblestones or macadam pavement. Strongly built throughout. Adjustable and double reversible crucible steel point. Adjustable shoe. Loop handle wear irons. Four to six horses.

**Syracuse No. 98 Contractors’ Plow**

Heavy overlaid wrought steel share. Adjustable shoe. Loop handle wear iron. Four to eight horses.

**Syracuse No. 99 Contractors’ Plow**

For severe grading purposes in shale or hardpan. Slight turning capacity. Steel truss beam. Steel moldboard and landside. Separate shin piece. Four to eight horses.

**Taylor Subsoil Plow**

A valuable plow in sections subject to drought or where subsoil does not permit water, air and roots to penetrate readily. Cuts a gash in bottom of furrow, permitting water to move downward and spread out.

**John Deere—Syracuse Shovel Plow**

Blades and wings made of steel. Wings adjustable to throw more or less dirt. Especially adapted for hill-
John Deere Tractor Plow No. 5

Strong, power-lift plows, equipped with genuine John Deere bottoms that scour, wear well and make good seed beds. Quick detachable shares—loosen one nut to remove share; tighten the same nut and share is on tight. Beams guaranteed not to bend or break. Stiff hitch adjustable to any make of tractor. Sizes—2-, 3- and 4-bottom.

John Deere—Syracuse Two Way Sulky Plow

..With the Steel Frame and Auto Foot Frame Shift...

No. 40C Tractor Plow

The lighter-draft two bottom tractor plow with the great draft - reducing combination of self-adjusting hitch and rolling landside. The hitch is always automatically right at all depths; the bottoms always run true and level, and all of the weight is wheel-carried; therefore, the "40" pulls exceptionally light. Special steel makes his light-weight plow a giant in strength. Beams guaranteed not to bend or break. Simple, positive power lift.

John Deere Tractor Plow No. 41

This plow is built especially for Fordson owners who require a single-furrow plow.
It is widely used in plowing extremely heavy soil: plowing unusually hard ground, or in plowing unusually deep.
In such conditions, having the right hitch at all times is especially important.
The hitch of the No. 41 adjusts itself. This is a time-saving, work-improving, draft-reducing feature which very user of the No. 41 appreciates. Every plow or the Fordson needs it; only the John Deere plows or the Fordson have it.
Every time you adjust the plow for depth with the handy depth lever, the hitch adjusts itself up or down to the correct line of draft.
Thus, the hitch being always correct, the bottom always runs true and level. There is no "nosing in" or hopping out. At all depths, without any attention to the hitch adjustment by the operator, the bottom pulls light and does good work.

John Deere—Syracuse No. 4 Sulky Plow represents the highest type of material and workmanship that it is possible to procure. The entire frame and beams are constructed entirely of high carbon steel, hence are very strong and durable.
The Auto Foot Frame Shift makes it possible to regulate the width of furrows with perfect accuracy when plowing around curves, in irregular fields, and on side-hills. By its use the team is relieved of all side strain.

Sizes
1342S-1442S 3 to 8 in. deep
Medium Size 1341S-1441S 12 to 16 in. wide
Large Size 1341S-1441S 4 to 9 in. deep
14 to 18 in. wide

Fitted with either Jointers, Hanging Cutters or Fin Cutters. Two or Three-Horse Eveners.

John Deere No. 4 Tractor Plow

Greater strength, more clearance in this new two-bottom tractor plow. Every vital part is built extra strong. Power lift. Cushion spring release hitch protects both plow and tractor.

John Deere No. 2 Two-Way Tractor Plow

John Deere now offers you a new and distinctively different two-way plow—one that turns two furrows every trip across the field. It's the John Deere No. 2 Two-Bottom Two-way Tractor Plow.
John Deere General Purpose Farm Tractor

The Tractor that Develops More Power with Less Weight

In no other farm tractor built can you find the combination of advantages found in the John Deere.

It contains the very improvements and refinements in tractor construction you have been looking for. It develops greater power with much less weight. The working parts are all enclosed and operate in an oil-tight, dust-proof case. All working parts are bathed in oil automatically. It is simple, compact, low to the ground. Easy to understand, operate and adjust.

A Light-Weight Tractor

The John Deere, developing 10 H.P. on the drawbar and 20 H.P. at the belt, weighs only 3,600 pounds. It will not pack the soil or mire down. This is an important point with every tractor user. The correct distribution of weight provides ample traction to handle loads up to its capacity. The center of gravity being low, gives the John Deere a decided advantage over the ordinary tractor.

Simple Adjustments Easily Made

The clutch brakes, drive chains, taper roller bearings on rear axle and front wheels and the carburetor, all can be adjusted quickly and accurately from the outside of tractor.

Roller and Ball Bearings Reduce Friction

The John Deere is fully equipped with friction-reducing bearings. For example, the rear axle and front wheels are provided with taper roller bearings. The transmission and belt pulley are equipped with roller bearings. The governor shaft and fan shaft operate on frictionless ball bearings.

Deere Combination Tongue Truck
For Steel Stub Disc Harrow

The new Deere Combination Truck and Fore Carriage illustrated here-with will fully meet the requirements of all disc harrow users. It is simple, strong and compact in construction. The wheels are solid steel with wide oval tires and with closed bearing boxes.

Can also furnish Tongue Truck to fit any make of Disc Harrow having a wood stub pole.

Improved Stone Boat Front

This device enables the farmer to make a stone boat in one hour's time with ordinary straight plank that he may have on the farm. All tools necessary are saw and bit.

John Deere Model “B” Disc Harrow

The Flexible, Third-Lever Harrow

Each gang of the Model “B” can be given the proper angle to pulverize under difficult conditions, and can be given light pressure, by means of lever controlling powerful pressure spring and pivoted yoke, to go over ridges without burying harrow at its center; or heavy pressure to penetrate and pulverize in dead furrows and other depressions—no ground is skipped. Strong, all-steel frame; double-bar, riveted gang frames; oscillating scrapers and unusually convenient grease cups.

Rear gang and hitch can be furnished to convert this harrow into a double action, horse- or tractor-drawn harrow.

John Deere Model “L” Tractor Disc Harrow
With Yielding Lock Coupling

Exclusive yielding lock coupling, special aligning device and pivoted yoke with spring-pressure feature insure a better job of disking entire width of harrow under all field conditions with this harrow.

Yielding lock coupling locks on the straight-away, compelling rear gangs always to cut down ridges left by front discs; yields in turning—not trailing of discs—not skidding around corners.

A flexible harrow. Gangs follow the uneven surface of the ground because they work independently of each other. Either section can be angled from the tractor by means of convenient crank, without stopping or backing. Front gangs can be given light or heavy pressure, by means of a crank and powerful pressure spring.

John Deere Pony Tractor Disc Harrow

For use with any standard tractor. Front section, out-throw; rear section, in-throw—making seed bed level and thoroughly pulverized. Double-bar gang frames, unusually strong. Equipped with John Deere yielding lock coupling—rear gangs trail in proper manner—less strain on harrow—easier pull for tractor around corners. Oscillating scrapers
This is the New John Deere General Purpose Wide-Tread Tractor built especially for potato growers. No other general purpose tractor has ever been designed that fits in so perfectly with conditions in this territory.

The Work It Will Do—The John Deere General purpose Wide-Tread Tractor is ideally fitted for all farm jobs within its power, including efficient, big-capacity operation in planting, cultivating, and digging potatoes. Cultivates two rows at a time at the rate of 20 to 30 acres a day. Will pull two-bottom plow (moldboard or disk), two-row planter with fertilizer attachment, two-row tractor drive digger, and six-row tractor power sprayer.

Power Lift—Fourth Power Outlet—This tractor supplies power at the drawbar and at the belt, it has a power take-off; but more than this, it has a power lift which starts operating by a touch of the foot, to lift or lower the special cultivating or hilling equipment. The power lift makes the John Deere a complete self-contained, mechanically-operated and controlled outfit.

Simple, Understandable, Practical — There is nothing complicated or hard to understand about his tractor and its equipment; no expert operator is required. With this power equipment on your arm, help will no longer be a problem, and in addition to this you can get your ground prepared and crop planted, cultivated, and harvested under favorable weather conditions for bigger yields.

Horse Power. Suitable for 2-14" plows, 22" thresher.

Speeds. Low, 2-1/4; intermediate, 3; high, 4-1/8; reverse, 1-5/8 MPH.

Motor. 5-5/8" bore, 6" stroke, 550 R. P. M., 2-cylinder "L" head type horizontal.

Cranks honor Piece drop-forged, long bearings.

Connecting Rod. Drop-forged, two-bolt type.

Lubrication. Force-feed, geared pump.

Carburetor. Double-nozzle type with air choker.

Air Cleaner. Oil-filter type with vertical air stack.

Ignition. High-tension magneto, with enclosed impulse starter.

Cooling. Tubular radiator, thermostpphon.

Air Fan. Gear-driven, no belts.

Governor. Enclosed, by-ball type.

Clutch. 10" dry disks, locking in and out.

Belt Pulley. 13" diameter x 6-1/2" face, 950-R.P.M.

Belt Speed. 3200 feet per minute.

Transmission. Spur gear, selective type, 3 speeds forward, speed reverse.

Gears. Forged steel cut teeth and heat-treated.

Final Drive. Enclosed roller chains.

Drive Axle. 2-1/8" diameter, high-carbon steel.

Drive Wheels. 44" diameter x 8" face.

Front Wheels. 24" diameter x 4" face.

Bearings. Main: 3-1/8" long removable, bronze backed, babbit-lined.

Connecting Rod: 2-3/8" long removable, bronze backed, babbit-lined.

Front Wheels and Rear Axles: Tapered roller (8) front bolster tapered roller (2).

Transmission and Belt Pulley: Roller (1), Ball (4), tapered roller (2).

Fan and Governor Shaft: Tapered roller (4), ball thrust bushing.

Water Capacity. 9 gallons.

Length. Overall, 118-1/2".

Width. 76".

Height. 57-1/4" at radiator cap.

Drawbar Height. Adjustable, vertically, 54-1/2"; horizontally, 56.50.

Drawbar Clearance in High Position. 12-1/2".

Wheel Base. 78-1/2".

Rear Wheel Tread. 68".

Power Take-Off. For front or rear connections rotates clockwise, 550 R. P. M. Separate gear shift.
LITTLE GIANT WALKING CULTIVATORS

5 Tooth Little Giant with lever and gauge wheel. Price, $8.00
7 Tooth Little Giant with lever and gauge wheel. Price, $9.00
Horse hoe cultivator for 5 or 7 tooth. Price, $1.75
Celery hiller attachment for 5 or 7 tooth. Price, $3.25

5 Tooth Little Giant with lever and gauge wheel. Price, $8.00
7 Tooth Little Giant with lever and gauge wheel. Price, $9.00

This tool is used for working very closely to small plants of tobacco, corn, potatoes, etc. It thoroughly pulverizes, but throws no dirt on plants. It is also used as a Straight Diamond Tooth Harrow, also as a Smoother with sharp points down in order to cut and level the surface, the tooth, with sheared end down, being less liable to injure young plants when smoothing over corn, potatoes, etc. For very close work every other tooth can be quickly removed. 14 Tooth Little Giant with lever and gauge wheel. Price, $8.00

John Deere Steel Walking Cultivators

Deere Steel 14 Tooth Cultivator

Because of the steel and malleable construction these Cultivators are very durable and free from breakage. Furnished with Horse Hoes or Long Hillers.

No. 306. 5 Tooth with lever and gauge wheel. Price, $8.00
No. 314. 7 tooth with lever and gauge wheel. Price, $9.25

Same high-grade construction as the 5 tooth and having two more teeth.

Horse Hoe Attachment, for 5 or 7 tooth.......................... 1.75
Long Hiller Attachment, for 5 or 7 tooth.......................... 3.75

Deere Handy Farm Mixer

It will mix Concrete, Fertilizer, Stock and Chicken Feed. It will wash Potatoes, Beets and other root crops. Every farm owner has ideas of improving his farm, increasing its value not only by increased fertility of the soil, but also by the addition of permanent farm structures. Concrete forms the cheapest and best foundation for all improvements.

All Metal Construction
Steel and iron are the materials that make the Handy Mixer. Simple Gear Drive. Sturdy, powerful gear-drive construction. Drum 22 in. diameter, 21 in. deep, 17 in. opening. Capacity, wheelbarrow load. Weight, 180 lbs.
NEW JOHN DEERE
The Low-Down Spreader with the Beater on the Axle and the Box-Roll Turn, Narrow Type—Tight Bottom

away with high pitching, the hard part of loading; it saves work.
The beater on the axle, which permits lowering the rear end of the box, because the axle is not underneath it. In accomplishing this desired result, it has not been necessary to reduce the height of the drive wheels, neither is it necessary to throw the manure over the drive wheels in loading.
The Box-Roll Turn, which permits short turning without cutting the front wheels under the box, gives you a box that is exceptionally low and easy to fill.

Don’t forget, the New John Deere Spreader is the only spreader built that has the beater on the axle and the box-roll turn. Both are exclusive features which are of real value to you.
Roller-bearing equipment at both ends of all three beaters reduces draft and wear at these important points.
A tapered box—wider at the rear—does away with friction between manure and box sides as the load moves toward the beaters.

John Deere Manure and Straw Spreader
The Spreader with the Beater on the Axle

The Low-Down Spreader with the High Drive Wheels

Easier on the Man. Only 36 inches to the top of box—6 to 10 inches lower than other spreaders—a big time- and labor-saving feature.

Easier on the Horses. The high wheels on this spreader, from 4 to 8 inches higher than used on other spreaders, give it a light-draft advantage.
The load of manure, which in itself weighs a ton on the average, is moved back to the beater on an apron which runs on many rollers—the load is not dragged.
The location of the beater in relation to the apron is such that the teeth engage the manure as it is fed to them in practically a horizontal position—they do not work against the load as it moves backward.

Does a Better Job of Spreading. You can load the John Deere just right for the most effective spreading—flat on top and from the front to the rear.

John Deere K H Riding Cultivator
177—8 Shovel Spring Tooth

When you are in the field with the John Deere K H Cultivator, you are equipped for clean cultivation in rows of any width from 30 to 48 inches.

Balances Perfectly

With the master lever, you raise or lower both rigs. When the rigs are raised for turning, the cultivator is perfectly balanced. The pole does not fly up. When you lower the rigs by releasing the master lever, all shovels enter the ground level.

Full Width Cut, Always

The rigs shift parallel. That means that the sweeps or shovels on both rigs always point straight ahead in the direction in which the cultivator is travelling and cut out full width of the rigs.

Shovels Penetrate Hard Soil

The hitch of the K H is of the drop, or pendant, style; pull of the team is directly on the rigs, thus bringing the draft in the proper place for penetration.

John Deere K L Riding Cultivator

With the K L, you can do the same good job of cultivating in rows varying from 30 to 48 inches wide. The wide adjustment is made by shifting the wheels and the frame in and out—a simple, easy job. Descriptive folder will give full details.

KL177—8 Shovel Spring Tooth

All Prices Subject to Change Without Notice
Spring Tooth Harrows

This harrow's sharp-pointed penetrating teeth work the seed bed from the bottom to the top. They tear out underground roots, stems and weeds, bringing them to the surface, mix and fine the seed bed. Non-clogging. Any number of sections can be combined. Reversible levers for use at front of harrow and tractor hitch for easy operation with tractor.

15 Tooth, two horse .......................................................... $23.00
17 Tooth, two horse .......................................................... $24.50
10 Tooth, one horse, top handles ........................................ $19.50
10 Tooth, one horse, less handles ....................................... $16.00
9 Tooth, one horse, less handles ........................................ $15.50

Deere Universal Spike Tooth Harrow

Made of steel throughout which gives strength without useless weight. The lever allows the teeth to be angled in any desired position and is also provided with a spring trip, allowing the teeth to give in stony or rooty ground.

One Section, 30 Teeth, One Horse .................................... $11.00
Two Sections, 60 Teeth, Two Horse .................................... $22.00

John Deere Type E Gasoline Engine

The Enclosed Engine that Oils Itself

The John Deere Type E puts the farm engine now on the same high plane in design and construction with other modern power machinery. The complete enclosure of its operating parts and its automatic oiling system, while outstanding features, are but two of the many improvements that make it a profitable investment for every farmer.

Type E engines are built in three sizes. 1½ H. P. furnished with Magneto or Battery Equipment. 3 H. P. and 6 H. P. with Magneto only.

King of the Corn Field Planter

This Corn Planter has been for years one of the leading machines for planting corn, beans, peas, beets and other seeds used throughout this territory. It is equipped with fertilizer distributor, and is perfectly adapted to all requirements of this section. It can be arranged to drop any desired quantity of seed or fertilizer; can also be used for planting corn and beans at the same time, dropping each kind of seed in rotation.

The Automatic Hand Corn Planter

In the Automatic Corn Planter are Combined all the latest and best improvements yet made in implements of this character. In this planter the seed is delivered from the dropper to the receptacle at the bottom, which, when opened by pressing over on the foot, leaves it at once at the depth required, avoiding the trouble found with all hand planters that deliver the seed direct from the dropper to the soil. It also has a most convenient attachment for regulating the depth of planting; this can be raised or lowered in a moment and insures delivery of seed at precisely the depth required, whether the soil be hard or mellow.

Cahoon Seed Sower

Will sow all kinds of grass and grain seeds from four to eight acres per hour at a common walking gait. Heavy seeds, such as wheat, it will throw 40 feet (20 feet each side of the operator); lighter seeds, of course, will not be thrown so far.

Price, $5.00; Postpaid, $5.15

Cyclone Seed Sower

This sower is guaranteed to distribute all grass seeds and grains perfectly even and directly to the land. Sows grass seed from 18 to 20 feet and grains a longer distance.

Price, $2.25; Postpaid, $2.40

All Prices Subject to Change Without Notice
John Deere No. 999 Corn Planter

No. 999 with Fertilizer

Equipped with John Deere Natural Cell-Fill, edge-delivery seed plates—a dropping device just as accurate as the human hand.

Variable-Drop Device—a great feature—enables you instantly to change the drop to meet varying conditions of soil in the same field. By merely shifting a foot lever, without leaving the seat or even stopping the team, you can change the drop to two, three or four kernels per hill—always the exact number desired.

999 Fertilizer Attachment

Fertilizer attachment handles any standard fertilizer, any quantity up to 700 pounds per acre. Fertilizer can be checked with each hill of corn or drilled along the row while corn is being checked.

Hoover Visible Potato Planter with Fertilizer Attachment

The Hoover is noted for its accuracy in dropping potatoes. Agitator in hopper prevents potatoes from bridging. Hopper holds 2 1/2 bushels. Positive feed wheel elevates potatoes to the picking chamber. Speed of this wheel is easily controlled to keep the right amount of seed in the picking chamber; picking chamber concaves hold seed properly for the pickers. Adjusting springs give the right pressure on the seed to get best results.

VAN BRUNT FERTILIZER DISC DRILL

Light Weight Light Draft Force Feed
Spring Pressure Large Capacity

Even Seeding in Furrows of Uniform Depth. No Ground or Seed Wasted.

The drill that puts any seed, from alfalfa to bearded oats, at the bottom of furrows of even depth, without choking up and failing to sow part of the field or planting too much in other parts. All grain is ready for harvest at one time. Any standard fertilizer is handled by the Van Brunt just as accurately as seed. Send for Booklet.

Improved Robbins’ Potato Planter

The 100 Per Cent. Potato Planter

It is results that count in potato culture—the net return in dollars and cents. At the same time there is a lot of satisfaction in a clean field with straight rows and every hill planted. It is the sign of a practical farmer. The right start is half the race and here it is—an automatic machine planter that places every seed piece exactly as you want it without a miss or a double and without injury. The result is, every hill planted at the right depth, the right distance apart and covered level or ridged. Has a very positive and successful fertilizer attachment that will handle all kinds of commercial fertilizers.

Van Brunt Lime and Fertilizer Sower with Oscillating Agitator

The Van Brunt Lime and Fertilizer Sower is built in the standard size to cover eight feet of ground, with a carrying capacity of ten bushels. For strength, durability and simplicity it is unequaled.

This sower has 36-inch steel wheels with staggered spokes, heavy wide rims, removable dust-proof boxings, and compression grease cups with chilled wheel bearings. The hopper is exceptionally strong, of selected well-seasoned matched lumber; steel ends with angle steel corners, thoroughly braced; close-fitting covers and removable screens. Send for Booklet.

John Deere Farm Trucks

In price, strength, draft and finish, John Deere farm trucks give exceptional satisfaction. They stand hard usage year after year because they are built right and in a factory that has an established reputation for making only the best wagons and trucks. The same careful workmanship as the same well-seasoned, selected oak and hickory are used in their construction as are used in the famous John Deere Farm Wagons. We can furnish trucks with either wood or steel wheels, in various styles.
John Deere High-Lift Mower

When you get on the seat of the John Deere Mower the first outstanding feature you will notice is its high, easy lift with either foot or hand lever. You will appreciate the quickness and ease with which every field condition can be quickly met.

Its durable and simple construction; the ease with which adjustments can be made to keep it in good running order; the ease with which repairs can be made—these qualities too, built into this light-draft, high-lift mower, will prove your good judgment in your selection.

No. 2 Mower with Tongue Truck

Extra high lift with foot and hand lever combined. Flexible cutter bar. Easy to keep in perfect cutting order.

John Deere Self-Dump Sulky Rake

A rake you can keep in good running order for years. Important working parts interchangeable, reversible or adjustable, giving extra wear with no repair expense. Arched steel axles give wheels proper pitch and gather at all times. Foot trip secures instant dumping.

Made in 8-, 9-, 10- and 12-Foot Widths.

New York Champion Wood Rake

For years the New York Rake has been the best known and most successful wood rake in this locality. We would certainly recommend the above to our customers who do not desire a steel rake.

New Deere Hay Loader

The loader with the flexible floated gathering cylinder. Successfully handles anything from the lightest swath to heaviest windrow. Does not dig into the ground surface, but rakes the ground clean and gathers no trash. A steady stream of hay is put onto the wagon without damaging the hay. The New Deere automatically adjusts itself to any amount of hay. Wheelbarrow mount prevents sagging and spreading. Automatic hitch and your ability to unhitch from top of load are additional advantages.

John Deere-Dain System Windrow Hay Loader

Especially adapted to handling hay air-cured in the windrow. Good capacity and good work. Handles alfalfa, clover, beans and similar tender hay without loss of leaves. Only one cylinder — lighter than a double-cylinder loader. Drum is mounted on the axle. Especially adapted to hilly countries because of very light draft. Pivoted front truck makes handling easy—a boy can do it. Large expansible throat openings and slow speed of raking teeth prevent beating and threshing hay. Rakes only clean hay, because it has flexible teeth, and the hay is placed in the center of the wagon.

John Deere-Dain System Rake

Cure hay nature's way with the John Deere-Dain System Rake. Preserve its natural color and richness of foliage. You can follow the mower closely with this rake. The steady motion of the curved teeth throws the hay into loose, fluffy windrows, through which the air readily passes. It does the work without damaging the hay. The inclined frame gives increased capacity at point where volume of hay handled is greatest. All adjustments can be made from the seat with the rake in motion.
When you buy **NIAGARA DUST** and **DUSTERS** you buy Protection

---

**Niagara Blower Dust Gun**—Simple—Easily Operated—Most Effective.

The ideal dusting machine for small acreages, estates and greenhouses.

---

**Niagara Blower Dust Gun Single Row Attachment**

**Niagara Blower Dust Gun with Two Row “Y” Attachment**

---

**Niagara “Kolo” Dusting Materials**—The new exclusive Niagara Duffs that “Stick through wind and rain”—have toxic properties unapproached by any other sulphur dusts.

**Niagara Model F Orchard Duster** mounted on a special cross reach orchard truck, powered by a 5 H. P. New Way Engine is the best insurance a fruit grower can have that he will get in and over his orchard on time to control insects and diseases.

**DUSTING POTATOES AND TRUCK CROPS**

**Niagara Copper Lime Dusts** are the standard of perfection—“mechanically correct—scientifically accurate.”

**Niagara Kolotex**—The new exclusive Niagara fungicide and insecticide dust used to control both diseases and externally chewing insects on tree and bush fruits.

---

**Fruit Duster**

**Niagara Kolodust**—the new exclusive Niagara fungicide used to control diseases of tree and bush fruits.

---

**Crop Duster**

The new Niagara Dri-Fog Crop Duster will dust 3 to 3½ acres of potatoes or other row crops per hour, covering completely the upper and under surfaces of the plants, delivering dust at the rate of 5 to 100 pounds per acre.
Niagara Plunger Gun for the home garden.

Orders are placed in advance of the season.

Niagara D-25 Dust—fungicide only, used to control blight of potatoes and some other diseases of truck crops. Packed in metal air tight containers.

Niagara Calcium Arsenate—The cheapest and most effective poison that can be purchased in the trade today. Find out all about this poison before you buy. Price on demand.

Niagara D-18 Dust—Fungicide and insecticide, used to control blight of potatoes, etc., also containing poison to kill potato bugs and other externally chewing insects.

Niagara A-1 Nicotine Dust will control aphis, leafhopper and other sucking insects of ground crops and fruit crops.

Niagara P. A. Nicotine Dust. Used in place of A1 where a stronger nicotine content is desired. Recommended especially for peas.

Niagara Arsenate of Lead is still the standard for comparison.

These two poisons are the standards by which other poisons are judged. They may be used in combination with Lime-Sulphur, Bordeaux Mixture and oil sprays like Emulso. We are not offering you a price because the price on these commodities fluctuates from day to day. When you are ready to buy, we shall be pleased to give you quotations.

John Deere Grain Binder

John Deere Corn Binder

The binder with quick-turn tongue truck. Quick-turn tongue truck takes off neck weight and permits quick and easy turning at ends. All important parts are equipped with oiler bearings. A light-draft and long-lived machine.

The New “Bufco” Forge with 18 in.-22 in. Hearth

The advantages of the hand-crank blower over the old lever and wheel types are well known. Until the perfection of the “Bufco” blower, however, the cost of the crank type has often been prohibitive.

The new “Bufco” has smoothed out the difficulties. It is a small blower of new design with a gear ratio of 36 to 1, steel spur gears throughout, a one-piece gear case, which is oil and dust tight, and a 5½ inch straight blade fan in a 7½ inch fan case. The fan is made of sheet steel, and is powerful enough to furnish a strong blast with little effort.

The old agricultural type forge will soon be obsolete, now that the “Bufco” can be had in the following:

“Bufco” 061, 18 in. diameter of Hearth, Shield type of hood, 85 lbs. shipping weight.

Price, $12.50
Brillion Soil Pulverizer and Packer

This implement crushes, pulverizes and packs the soil so that moisture is conserved, germination hastened — soil-blowing and washing are prevented and weeds killed. Strong steel frame; V-shaped or tooth wheel sections; self-aligning roller bearings. Steel axles. Various styles and sizes for either horses or tractor.

The Ireland Geared Hoist

A powerful machine that saves time and labor in storing hay and in other hoisting. Used in connection with harpoon fork or sling. Attach it to your own engine. Safe and easy to operate. Instant control.

Type C—Single Drum With Brake

Type C has level automatic brake rim on drum, which automatically engages with adjustable brake locks, thus holding load at any desired point, without attention. Brake may be rendered inoperative so drum may turn freely.

Hisco Wing Potato Hoe

Two-Piece Wings

There has always been a large demand for a Wing Potato Hoe of this type. They are constructed of the best material and are invariably satisfactory to our customers. They are fitted with an adjustable extension on the wings which is a decided advantage.

Price .......................... $12.50

Hisco Disc Potato Hoe

A great many persons prefer the disc type of hoe in preference to the wing. Standards are movable on crossbar to allow spacing of disc.

Equipped with 20-inch disc.

Price .......................... $14.50

The Sharples Suction-Feed Tubular Cream Separator

Since the beginning of the centrifugal separator, its one great province has been to save. Save cream, save butterfat, save the warmth, freshness and value of skim-milk, save labor, save quality of produce, always saving. What it saves is its value. It has no other value.

The Sharples Suction Feed Separator is the only one which automatically adjusts the flow of milk to the separating force. It simply sucks in enough milk so that the speed of the bowl can take care of it. In this way, it makes little difference whether you turn the crank under speed or above speed, you will always get a dead clean skim. Just set the cream screw and the cream will contain exactly the same percentage of butterfat.

There are many other advantages in using the Sharples. The supply can, for instance, is only 24 inches above the floor, so that it is easy to fill from the milk can. The Tubular bowl contains no discs or other contrivances which are hard to wash and hard to keep clean. The Sharples is easy to turn, because you can adjust the speed according to your strength.
Silver’s “Ohio” Light Draft Silo Fillers with Suction Blower

Direct Drive.
Drive pulley, cutting cylinder and fan wheel all on main shaft utilizes every ounce of power.

Patented Friction Reverse. By the use of a single lever all moving parts except knife cylinder, can be instantly stopped, started or reversed without the slightest strain. Not a gear tooth changes mesh in reversing.

Accessibility. Knives and cutter bar can be readily removed for sharpening or replacement without disturbing other parts.

Special Features of No. 40, No. 60 and No. 90

No. 40—Ohio Blower with traveling feed table; with 9-inch throat, two knives and curved elbow for top of pipe, not mounted. Weight, 790 lbs.

No. 60—Ohio Blower with traveling feed table; with 11-inch throat, two knives and curved elbow for top of pipe, not mounted. Weight, 835 lbs.

No. 90—Ohio Blower with traveling feed table; with 13-inch throat, two knives and curved elbow for top of pipe, not mounted. Weight, 900 lbs.

“Buffalo” No. 611 Ball Bearing Drill

The frame of this drill is strongly ribbed and will withstand extremely rough handling.

Shaft and spindle of steel, extra heavy and carefully finished.

Bearings are bored and reamed in the solid metal of the frame. This insures smooth, easy running.

Gears are carefully made and fitted.

Has hand and automatic feeds.

A round, slotted table is provided, which can be adjusted to any position—up, down or sideways.

SPECIFICATIONS

Drills to center of 11 inch circle; drills holes up to 3/4 inch; spindle diameter 3/4 inch; run of feed 3 inch; run of table 9 inch; length over all 33 inches; shipping weight 63 lbs.

Spindle drilled for 3/4-inch straight shank bit. On special order, furnished also for 3/8 or 1/4-inch. Price, $12.00

Ohio “Rapid” Root Cutter and Pulper

The knives are double-edged and reversible, one being straight, for slicing, the other edge being grooved, thus dividing it into separate bits for pulping.

Capacity — Capacity per hour, slicing or pulping, hand, 30 bushels; power, 125 bushels.

Pulley—Size of pulley for power, 10 x 4 in. Weight, 215 lbs.

No. 832 Root Cutter and Pulper, 6 knives, for hand or power $25.00

Ohio Lever Cutter

The “Ohio” Lever Cutter will cut hay, straw, corn stalks and every kind of feed. It is equipped with one 11-in. oil-tempered knife; also provided with a guard plate, adjustable to vary the lengths of cut.

No. 778 “Ohio” Lever Cutter, weight 55 lbs. $6.00

Pony Hand Feed Cutter

The Pony Cutter, as illustrated below, is strictly a hand machine.

A bushel of hay can be cut in thirty-five seconds. Cuts all kinds of feed. Only high-grade material is used, and makes it a strong and efficient cutter.

No. 783. One 11 1/4 in. knife cut 1/2 to 2 in. Weight 165 lbs. $23.00

Steel Road Scrapers

They are shaped cold from a single piece of steel lapped and riveted at the corners. They are uniform in thickness throughout except at the corners, where they are of double thickness.

No. 0. Capacity 9 cubic feet, weight 150 lbs.
No. 1. Capacity 7 cubic feet of earth, weight 98 lbs.
No. 2. Capacity 5 cubic feet of earth, weight 90 lbs.
Dowflake Calcium Chloride

Dowflake is a perfected form of Calcium Chloride, is white in appearance and resembles common salt, except that it is in the form of flakes rather than small granules. It has the property of absorbing from the air and holding three times its own weight in moisture.

Dowflake is an efficient dust preventive and road binder.

Packed in 100 lb. moisture proof bags and 350 lb. metal drums.

Porter Cow Stalls

Porter cow stalls are designed for the man who is dairying for a profit. Containing only the best of materials for the purpose and being free of frills and adjustable attachments, these stalls are made for permanent installation and there is practically no maintenance expense.

All tubing is 1/8 inches O. D. high carbon steel and the fittings are of certified malleable. Standard width, 3 ft. 6 in. Furnished with fig. 15 stanchion.

Fig. 604—Cow Stall as fitted for cement floor.

Porter Litter Carrier

The Porter Geared Hoist Litter Carrier, Fig. 633, is the only litter carrier on the market made with geared hoist and is an exclusive Porter product.

Fig. 633

It has numerous exclusive features. Simplicity in design and operation means that there is no maintenance expense, and installation is both practical and reliable. The proper gear ratio enables the load to be elevated readily without sacrificing speed.

Hopper is made of 20 gauge galvanized steel. Width, 24 in.; depth, 22 in.; length, 48 in. Capacity, 10 bushels.

Porter Columbian Track

Porter Cow Stanchions

No. 15 is made of Tubular steel and there are no sharp corners to injure the animal's neck. The inside width is about 7 1/4 in., which adapts this stanchion for practically all breeds of cattle.

No. 884 is made of U bar steel, light in weight and adjustable.

Fig. 672 Stanchion Anchor for Wood Curb.

No. 884

Fig. 124 Hanger
John Deere-Hoover Potato Digger

The name of Hoover on potato machinery has been a symbol of quality for many years. Linked with the name John Deere, the combination is one that carries even greater prestige. The Hoover line of potato machinery now has behind it the strength of the John Deere organization, makers of quality farm implements for nearly a century.

John Deere-Hoover Potato Diggers have exclusive features which enable them to deliver the crop in better condition, run lighter, last longer and operate more efficiently under all conditions.

Do Not Damage Potatoes

The rod type of elevator made of manganese steel elevates the potatoes without rolling and bruising them. The elevator is of original Hoover design with the links alternately raised and lowered. This tends to lighten the draft, prolongs the life of the digger, removes the dirt to best advantage, and leaves the potatoes in better condition.

Yukon Feed Cooker and Water Heater

The boiler of our Yukon Feed Cooker is made from heavy 16-gauge blue annealed steel. All joints and seams are securely welded and tested. The boiler is furnished with four heavy handles on sides. This is a very desirable feature as the feed can be carried to the stock. The boiler sets down one inch on the inside of the furnace which makes it impossible to get out of position.

The body forming the fire box of the cooker is also made of 16-gauge blue annealed steel. The grate is furnished so that either wood or coal can be used.

The fire door is large enough to admit chunks 10 in. square. Furnace sits on legs like a stove, making it perfectly safe to use in a building; burns cobs, wood or coal.

Farmers’ Favorite Cooker

DESCRIPTION

The top section or boiler, is made of heavy galvanized steel that will not rust, and is also provided with four heavy tinned malleable iron drop handles.

This sets down inside the lower section one inch, thus making it impossible for the boiler to slip to one side and tip over, as when on top of furnace.

The lower section of furnace is made with cast iron ends, and the center, or body, of heavy steel plate.

With this construction the entire surface of the boiler is exposed to the heat, thus making it a very quick heater.

No. 2. 30 Gallon.

Price, $20.00

### McKay Regular Tire Chains

These chains are made to fit all sizes of tires used on pleasure cars. Made from extremely strong lock chain link side chain, and uniformly hardened cross chains, McKay’s give the utmost in wearing qualities.

The McKay Fastener is easy to open and close. It forms a positive lock, connecting with the chain to prevent loosening.

### McKay Single Pneumatic Truck Chains

A strong chain—hardened by our special process (Patented), giving unequalled wear and life. Smoothly welded, electrically, they are easy on the tire and give positive traction. The new improved fastener (Patented) insures ease in putting on and taking off.

### McKay Dual Solid Truck Chains

Strong, well-made chains that will stand up under unusually heavy duty. So made that they fit closely and conform to the tire, eliminating unnecessary noise. Electrically welded cross chains of specially selected materials.

### McKay Husky Special Pneumatic Truck Chains

McKAY Husky Specials are EXTRA HEAVY, and the side chains are electrically welded. Made throughout from a much heavier gauge material than regular pneumatic truck chains.

Particularly advantageous for heavy haulage in mud, sand and other conditions where the hauling is unusually heavy and is not on paved roads.

Made with cross chain in every fourth link of side chain. This style is 15% to 50% heavier than regular pneumatic chains.

116.
A TIRE FOR those who know the wisdom of buying first for quality and second for price.

Let your customers take just one look at the new Richland Duplex. The rugged goodness so evident on the outside is a real assurance of the quality that's within.

Nearly twice as much new, live rubber in the deep cut tread. Nearly twice as much cushioning between the plies of extra heavy cord. Double-cushion breaker strip. Sturdy sidewalls, that take curves at high speeds. Engineered, designed and built throughout to give double the service, double the wear, double the satisfaction. Larger in size and used in pairs or sets.

You have never sold a tire so nearly puncture-proof, so well protected against blowouts, and other road hazards—a tire so certain to deliver to your customers more service than they have ever learned to expect.

RICHLAND EXTRA HEAVY TUBES

A big, sturdy, oversize tube of highest quality, made from finest rubber and produced according to the best modern practices in tube manufacture.

The Richland extra heavy tube is sold in a complete range of sizes for all types of Richland Tires, i.e., Duplex Service, Balloon, Heavy Car Type and Truck Cord. The same tube is used for the Duplex Service and Balloon Cord.
A tire for every use and purse  **Richland**

**BALLOON CORD**

The difference between the Richland Balloon Cord and the ordinary tire is apparent in its sturdier design and construction—its thicker and broader tread and its thicker, stronger sidewalls.

Those features which are not apparent but which are built into every Richland Tire from bead to bead are the finer grades of materials and the more exacting processes of workmanship which are great hidden factors of this tire's superior performance and extra mileage.

Combined, these high standards of tire building have brought about the universal satisfaction of Richland Tire users; a tremendous help to the dealer building his permanent profitable business.

**TRUCK CORD**

It is not the original cost—it is the reliable every day, ready to go service that counts in truck tire use. A commercial truck is only as serviceable as its tires.

The Richland Commercial Service Cord has effected such fine economies by having the quality to perform this exacting type of service that they are rapidly gaining ground in commercial preference.

Built into this commercial tire is unusual strength and durability at no increase in cost. Precision methods add resilient qualities to carry and cushion the heaviest of truck loads. Made in all sizes ranging from package delivery truck to heavy hauling equipment.
HARWOOD CORD

Here is a moderately priced line of tires made in all popular balloon and high pressure sizes, widely reputed to give extraordinary service compared with initial cost.

Materials ordinarily found in higher priced tires are exclusively used in Harwood Cords, insuring a fine value to the customer.

Accompanying this line of tires is a special quality Harwood gray tube made in a complete range of balloon and high pressure sizes.

RICHLAND

HEAVY CAR TYPE CORD

Here is a sterling quality, oversize, high pressure cord tire that embodies the finest in workmanship, material and design.

The Richland Heavy Car Type Cord has built a tremendous good-will among its users and a real tire business for dealers everywhere.

The speedometer tells the accurate story of Richland superiority and the economy of lower cost per mile to its purchaser and user.
From the day you stock the line of Richland Tires for selling your customers, you have an advertising and sales promotion service available that will prove valuable to you.

Enumerated in the foregoing column are some of the advertising materials you are entitled to receive, many of which are without charge to you whatever.

In addition your name is placed on the factory mailing list to receive constructive ideas in various forms on practical retail tire selling methods that will enable you to get your share of the tire business.

Factory co-operation is also extended in sharing the cost with you on such items as tire covers, toy balloons, electric signs, etc., that will afford you opportunities of a continuous active campaign for tire business in your locality.
ABC SPINNER

The ABC SPINNER leads the world in washing efficiency. At the snap of a switch it WASHES, REMOVES SUDS, RINSES, BLUES, STARCHES and DAMP-DRIES for the line.

Clothes are washed cleaner than ever before and ready for the line in half the time. Bulky blankets, griny garments or the finest fabrics are washed with amazing speed and thoroughness.

It’s new modern no-wringer spinner handles a whole tubful of clothes, while another is being washed. It brings new kindness to clothes drying. No broken buttons, hard to iron creases or torn garments.

Beautiful two-tone porcelain tubs—inside and out—clean like chinaware and keep their lustrous beauty and brightness forever. Smoother than any metal, it positively prevents clothes friction—the greatest cause of clothes wear.

Investigate this modern miracle washer. No other machine does every washing operation so completely, automatically or efficiently. Yet the price is remarkably low. You get all these modern features at no added cost. Price $165.00
